VANCOUVER, - BRITISH COLUMBIA

Double Barrel Shot Guns.

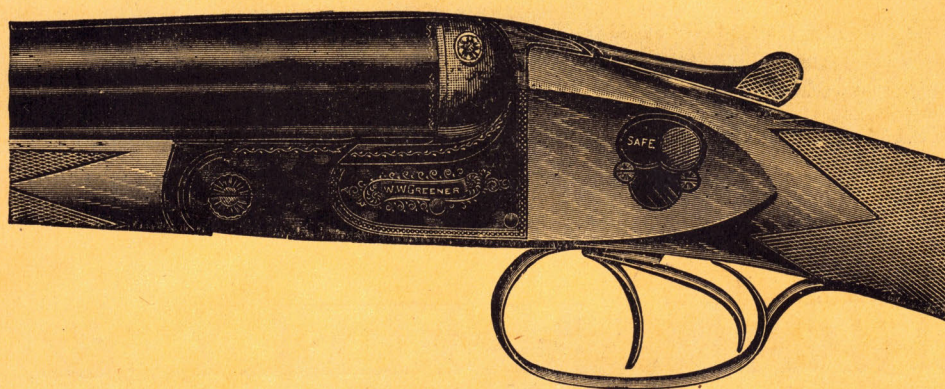

W. W. Greener Hammerless.

No. E10.—British Empire, 12 gauge only, 30 inch special quality steel barrels, independant side safe, selected English walnut stock, straight or pistol grip, full choke, guaranteed to make a pattern of 80% of the charge, new principle locks, with only 4 parts, finished in simple style but with great care, weight each 7 to 7 $\frac{3}{4}$ lbs. - - - - - each \$75.00

No. D13.—The Forester, 12 gauge only, 30-inch hard steel barrels, independant side-safe, selected English walnut stock, straight or pistol grip, specially bored for trap-shooting, patent treble wedgefast with Greener cross bolt, automatic intercepting safety bolt, weight 7 to 7 $\frac{3}{4}$ lbs. - - - - - each 100.00

No. F16.—Facile Princes Action, 12 gauge only, 30-inch hard steel barrels, independant side-safe, selected English walnut stock, patent treble wedgefast with Greener cross bolt, automatic intercepting safety bolt, weight 7 to 7 $\frac{3}{4}$ lbs. - - - - - each 125.00

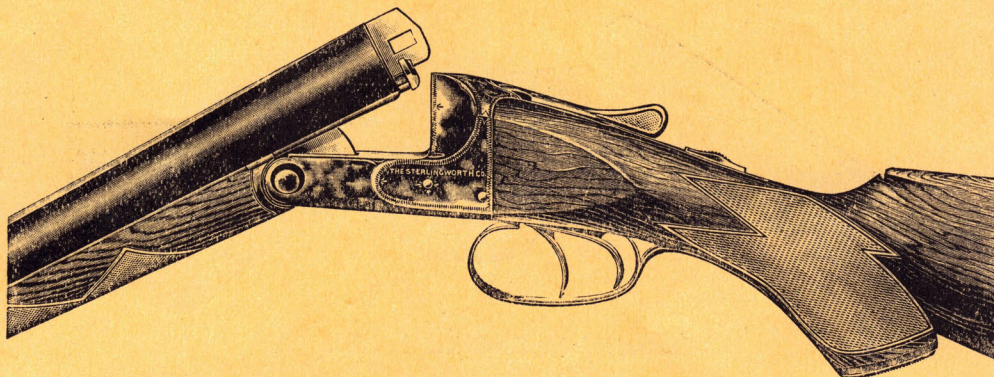

No. F20.—The International, 12 gauge only, 30-inch hard steel barrels, independent side-safe, facile princes action, selected English walnut stock, checkered grip and fore-end, patent treble wedgefast with Greener cross bolt, automatic intercepting safety bolt, weight 7 to 7 $\frac{3}{4}$ lbs., - - - - - each \$150.00

No. FH25.—Automatic Ejector, 12 guage only, 30-inch hard steel barrels, independent side-safe, seperate ejector, locks in fore-end, selected English walnut stock, checkered grip and fore-end, patent treble wedgefast with Greener cross bolt, automatic intercepting safety bolt, weight 7 to 7 $\frac{3}{4}$ lbs., - - - - - each 185.00

Double Barrel Shot Guns.

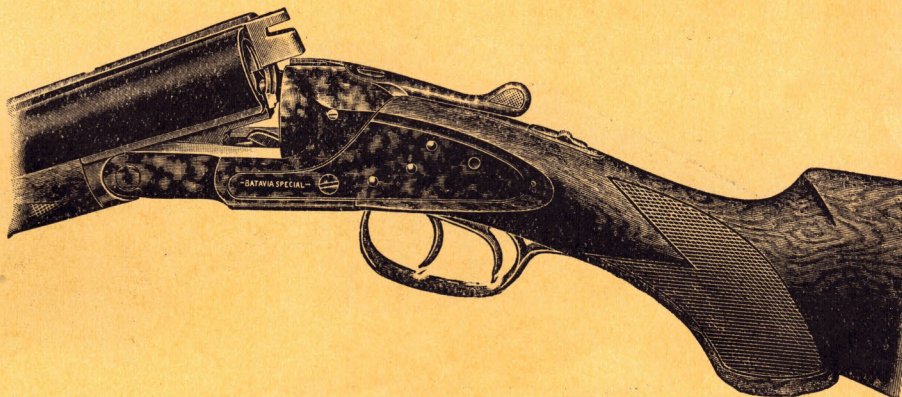

Sterlingworth Hammerless.

Guaranteed and Constructed for Nitro Powder.

The Sterlingworth, Plain, 12 gauge only, 30-inch fluid compressed steel barrels, both full choke, patent snap fore-end, American walnut stock with full capped pistol grip, length of stock 14 inches, drop $2\frac{3}{4}$ inches, weight $7\frac{1}{2}$ to $7\frac{3}{4}$ lbs. - - - each \$40.00
 The Sterlingworth, Ejector, otherwise same as above - - - - - " 60.00

Batavia Special Hammerless.

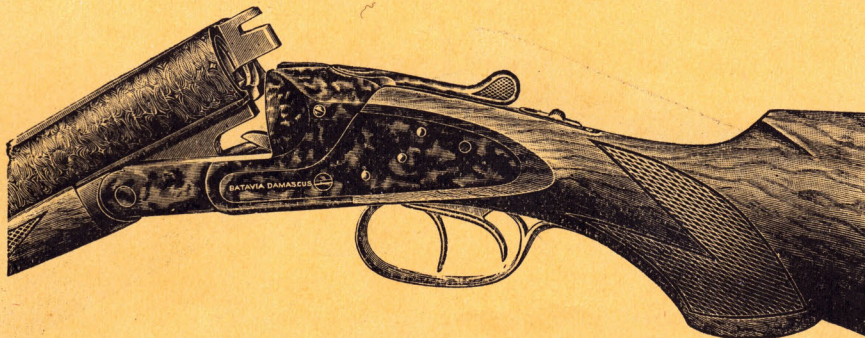

Guaranteed and Constructed for Nitro Powder.

Batavia Special, 12 gauge, homo-tensile browned steel barrels, length 30 inches, European walnut stock and fore-end, full pistol grip, neatly checkered, rubber butt plate, drop forged frame and action parts, weight each 7 to $7\frac{3}{4}$ lbs., - - - each \$25.00

A plainly finished low priced gun of excellent material and workmanship, built and bored to handle all standard smokeless and black powder loads. This gun has proven itself to be a strong, serviceable weapon that will stand any reasonable amount of use, and not get loose or snaky.

Batavia Damascus Hammerless.

Guaranteed and Constructed for Nitro Powder.

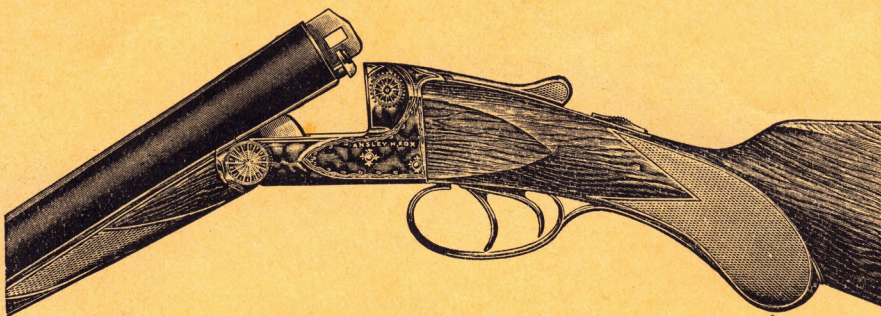

Batavia Damascus, 12 gauge, fine two-blade Damascus steel barrels, frame and action parts drop forged from fine machinery and tool steel, European stock and fore-end nicely checkered, full pistol grip of new design, plain and neatly finished, weight 7 to $7\frac{3}{4}$ lbs., each \$30.00

A similar gun in almost every respect to the Batavia Special listed above, but having very fine grade two-blade Damascus steel barrels. We can recommend either of these guns to anybody wanting a really reliable arm at a remarkably low price.

Double Barrel Shot Guns.

Fox Hammerless.

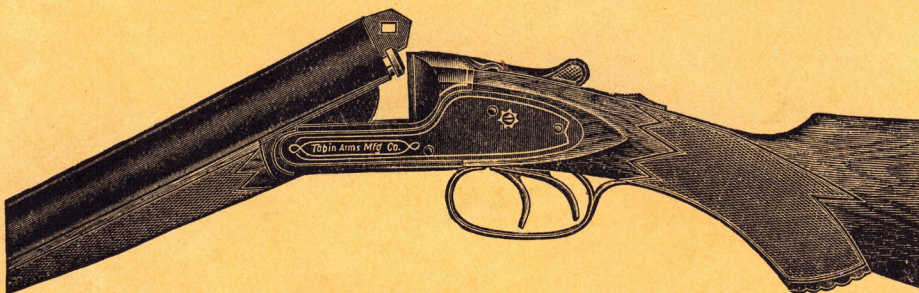

Guaranteed for Smokeless Powder.

- Grade A.**—12 gauge, 30 inch genuine krupp fluid steel barrels, concave rib with rotary bolted extension, handsome dark English walnut stock, Deeley & Edge pattern fore-end, hard rubber butt plate, automatic safety, perfectly balanced, engraved and finished, weight 7½ to 7¾ lbs., - - - - - each \$50.00
- Grade AE.**—Ejector, 12 gauge, otherwise same as above - - - - - " 75.00

This gun is guaranteed to be absolutely free from all defects in workmanship or material and any parts which at any time prove in the least defective, if returned for inspection, will be replaced free of charge. The main springs and top lever springs are guaranteed against breakage for all time and all guns are guaranteed to shoot any smokeless powder and never work loose.

Tobin Arms Co. Hammerless.

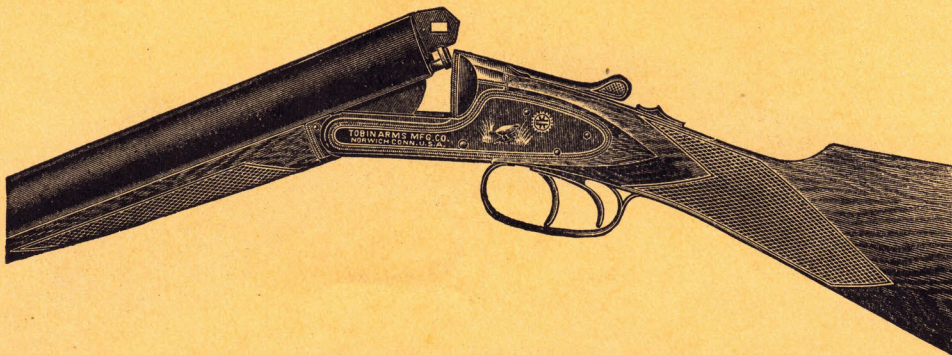

Guaranteed for Smokeless Powder.

- No. 40.**—12 gauge, standard grade, 30 inch "Trojan" nitro steel barrels, plain dark imported and selected walnut stock, full pistol grip, length of stock 14½ inches, drop 2½ to 3½ inches, weight each 7¼ to 7¾ lbs., - - - - - each \$27.50

This is a plain well finished gun that compares very favorably with any of the cheaper grade hammerless guns on the market. The fittings of the gun are unequalled at the price. All parts are made interchangeable, are few and simple and can be removed with the use of an ordinary screw driver.

- No. 55.**—12 gauge, Black Diamond grade, 30-inch pyro-oxidized black finished barrels, lock plates are nicely engraved and the pistol grip and fore-end are beautifully checkered, in every other respect this grade is similar to the No. 40 Standard Grade, each \$45.00

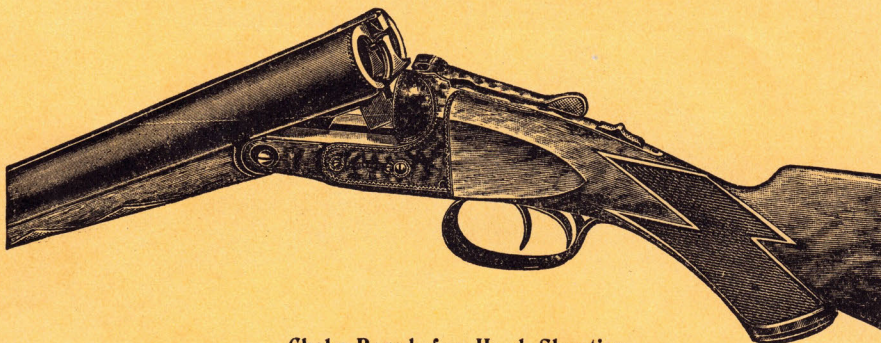

Guaranteed for Smokeless Powder.

- No. 70.**—Trap grade, built specially for trap shooters, plain finish, yet of such superior workmanship and construction as to appeal to the most exacting critic, 30-inch krupp fluid steel barrels, straight grip and fore-end neatly checkered, otherwise same as No. 40 Standard Grade, - - - - - each \$60.00

Special attention is given to the boring and shooting qualities of this gun. They are guaranteed to equal or exceed the pattern furnished with the gun. The trap grade is fitted with a machine file cut rib that places an absolutely dead surface along the line of sight.

---	---	---	---	---	---	---	---------------

The Hunter One Trigger is very simple, having only three important parts. The action is positive and works every time. It cannot possibly balk or double.

Double Barrel Shot Guns.

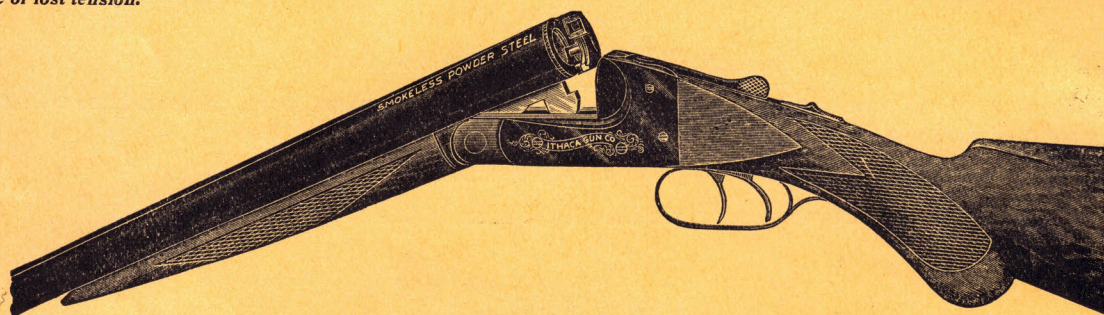

**Ithaca
Hammerless
Model
1909.**

All 1909 "Ithaca" Hammerless Shot Guns are fitted with the new three bolt fastening, built on the bevel to take up wear and guaranteed never to shoot loose or allow the gun to fly open.

A glance at the above illustrations will show that their new three piece lock action is the model of simplicity and that they have done away with all cocking bars, levers and push rods and hook the barrels right on to the toe of the lever. You will also note that coil springs are used and the Ithaca people guarantee these springs for all time against either breakage or lost tension.

Guaranteed for Nitro Powder.

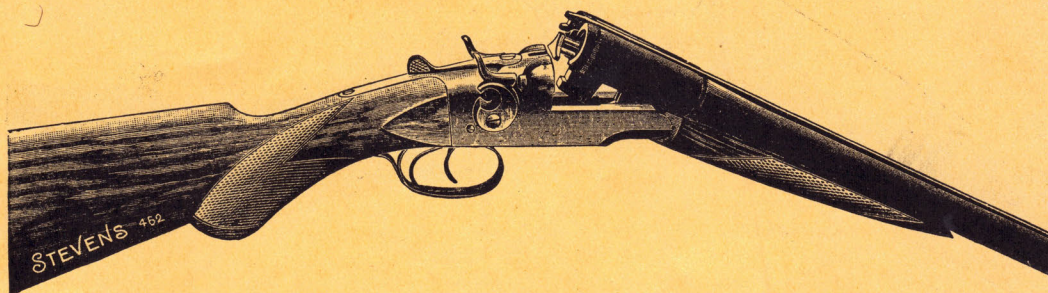

[illegible]

Automatic Ejector, Guaranteed for Nitro Powder.

each \$20.00

No. 4493.—16 gauge, weight $7\frac{1}{4}$ lbs., otherwise same as above,

20.00

Ladies' Breech Loading Hammer.

No. 21.—44 gauge, 26 inch twist steel barrels, back action, re-bounding locks, double under bolt, extension rib, walnut stock and fore-end checkered steel butt plate, shoots 44-40 shot cartridges, weight about $4\frac{1}{2}$ lbs.,

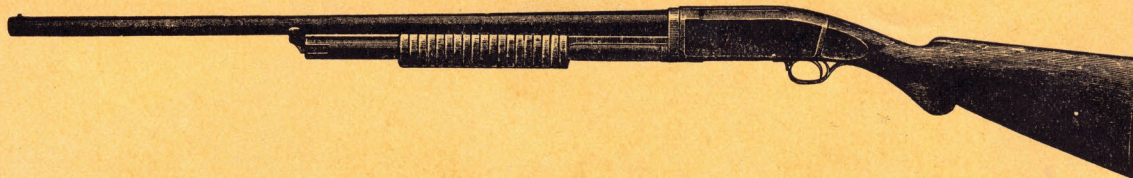

each \$15.00

This miniature shot gun has precisely the same mechanism as the larger gauge guns, and is an excellent gun for taxidermist or small bird shooting.

Repeating Shot Guns.

Remington Hammerless.

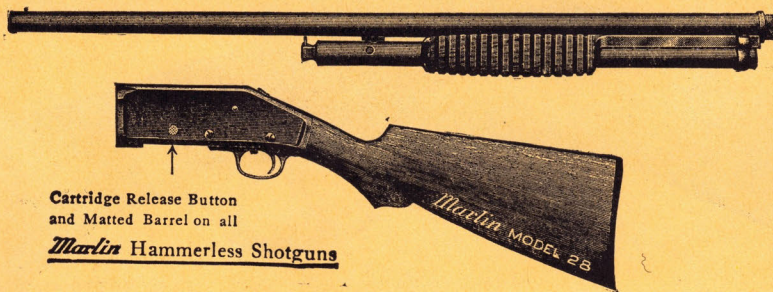

Model 1908, Repeating, Take Down, Guaranteed for Nitro Powder.

Standard, 12 gauge, 30-inch blued steel barrel, modified or full choke bored, selected walnut stock 13 $\frac{3}{4}$ inches long, 2 $\frac{1}{2}$ inch drop at heel, 1 $\frac{1}{2}$ inch drop at comb, selected walnut fore-arm, half pistol grip, case hardened frame, matted rib on receiver, rubber butt plate, weight 7 $\frac{1}{2}$ lbs., - - - - - each \$30.00

Trap, 12 gauge, 30 inch Ordnance steel barrel, blued finish, full choke bored, selected English walnut stock 14 $\frac{1}{4}$ inches long, 2 inch drop at heel, 1 $\frac{1}{2}$ inch drop at comb. case hardened frame and mountings, matted rib on receiver, rubber butt plate, will target 320 pellets of No. 7 $\frac{1}{2}$ chilled shot inside a 30-inch circle at 40 yards with 3 $\frac{1}{4}$ dra. of smokeless powder and 1 $\frac{1}{4}$ oz. shot, weight about 7 $\frac{3}{4}$ lbs., - - - - - each 55.00

The Remington repeating hammerless shot gun is most attractive in general design. There are no openings in top or side of receiver to weaken it, and it is absolutely solid in the rear. The breech block does not slide, nor is there an opening of any description at this point. The loading and ejecting of shells is done through an opening in the underside of the receiver. The hammerless feature affords protection from liability of accidental discharge. The recoil lock prevents the backward pull on the slide handle from opening the gun until released by the recoil of the exploded cartridge. A convenient safety slide on the trigger guard is provided. An indicator but on the right side of the frame projects when the gun is cocked and in a firing position. The take down device is simple and attractive in appearance. One quarter turn only is required to detach barrel from the receiver. All parts are interchangeable and guns are carefully tested and targeted before leaving the factory.

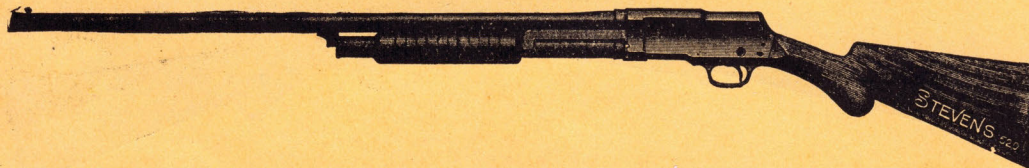

Cartridge Release Button
and Matted Barrel on all
Marlin Hammerless Shotguns

Model 28.—Grade A, hammerless take down, 6 shots, 30 or 32 inch full choke matted barrel, 12 gauge only, adapted to the use of all standard 12 gauge loads, barrels of special rolled steel, breech bolt, firing pin and other important working parts are of heat-treated nickel steel, butt stock and fore arm of fine, straight-grained black walnut, handsomely shaped and finished, genuine rubber butt plate, special cartridge release allowing removal of loaded shells from the magazine without working through the action, hammer and trigger safety conveniently located just in front of the trigger, made of the highest grade material by expert workmen, the safest hammerless shot gun on the market, weight each about 6 lbs. - - - - - each \$30.00

This arm fills every requirement of the sportsman who prefers the hammerless type of gun. It has the solid breech and side ejection with every other desirable and up-to-date feature. It is handsome in outline, neat, trim and handles fast.

Stevens' Hammerless.

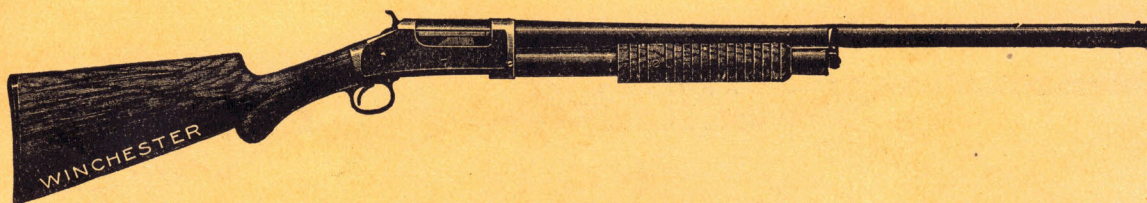

No. 520.—Browning's patent, 12 gauge, take down, 30 inch compressed forged steel barrel, black oxide finish, fancy walnut stock with pistol grip, checkered, fancy walnut fore arm, rubber butt plate, six shots, weight each 7 $\frac{3}{4}$ lbs. - - - - - each \$29.00

Owing to its simplicity this gun can be taken down and put together quicker than any other repeating shot gun made. It was designed by Mr. John Browning, an inventor of international prominence, and every detail both of design and construction is practical and up to date.

Winchester Repeating Shot Guns.

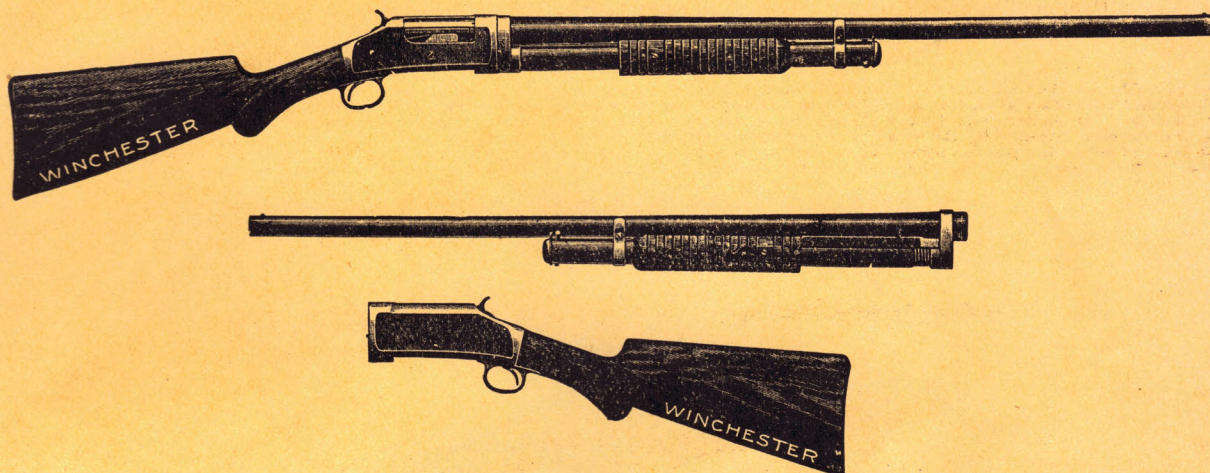

Model 1897.

Solid Frame.

Model 1897.—Standard Gun, 12 gauge only, 30 inch rolled steel barrel, plain walnut stock, half pistol grip not checkered, steel butt plate, blued frame and mountings, full choke-bored, weight $7\frac{3}{4}$ lbs., - - - - - each \$25.00

The great success which has attended the sale of the model 1893 Repeating Shot Gun led to a new form of this gun, which it seemed best, by reason of many changes and improvements, to call the Model 1897, although the users of the Model 1893 will recognize in it many points of similarity. The old form of sliding fore-end, breech-block, carrier block, hammer, and trigger have been retained, but in the detail many alterations are collected in the Model 1897 gun.

Take Down Frame.

Model 1897.—Standard Gun, 12 gauge only, 30 or 32 inch steel barrel, plain walnut stock, half pistol grip, not checkered, steel butt plate, blued frame and mountings, full choke-bored, weight $7\frac{3}{4}$ lbs., - - - - - each \$27.00

Model 1897.—Brush Gun, 12 gauge only, 26 inch rolled steel barrel, plain walnut stock, not checkered, half pistol grip, rubber butt plate, blued frame and mountings, cylinder bored, specially designed for shooting in cover, weight $7\frac{3}{4}$ lbs., - - - - - each 29.00

The Winchester "Take Down" Repeating Shot Gun is the popular Winchester Model 1897, with a strong, simple, serviceable, and handy-take down system applied to it. This gun can be taken apart and put together as easily and quickly as a double barrelled shot gun, and can be carried in a Victoria case, packed in a trunk or rolled up in camp bedding.

Model 1901.

Lever Action.

Model 1901.—10 gauge only, 32 inch rolled steel barrel, plain walnut stock, not checkered, steel butt plate, hardened browned frame, weight $8\frac{3}{4}$ lbs., - - - - - each \$30.00

The Model 1901 Winchester Lever Action Repeating Shot Gun is the only 10 gauge repeater on the market. It is expressly bored to handle either smokeless or black powder, and is particularly well adapted for duck and wild fowl shooting. This gun resembles in outline the original Winchester Lever-Action Repeating Shot Gun, but differs in detail.

Single Barrel Shot Guns.

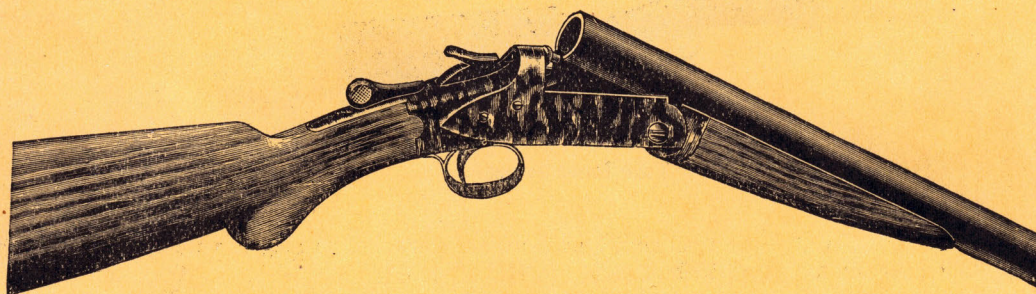

Iver Johnson.

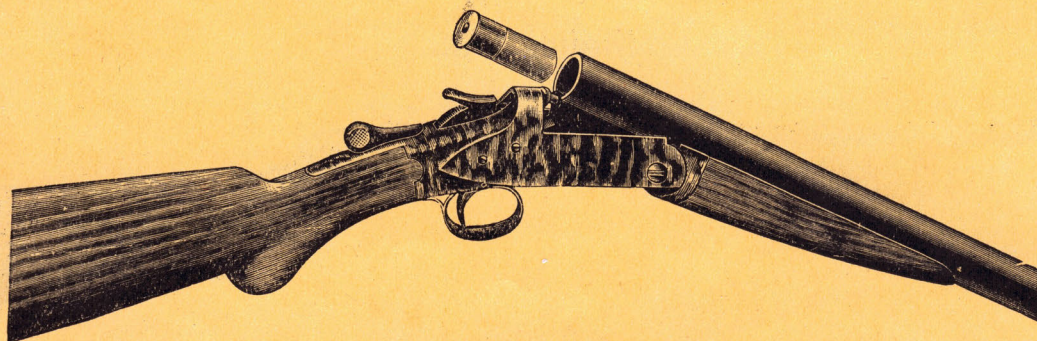

Champion Top Snap.

- No. 112.—12 gauge, 30 or 32 inch best quality hammer forged high carbon steel barrel, black walnut stock, oil finished, with fore-end to match, hard rubber butt plate, case hardened frame, blued, top lever, pistol grip, two piece take down, weight about 6 lbs., each \$7 00
- No. 112E.— 12 guage, with automatic ejector, otherwise same as above, - - - - - " 8 00

Stevens.

- No. 90.—12 gauge, 30 inch special steel barrel, choke bored for nitro powder, case hardened frame, top snap action, low rebounding hammer, walnut stock and fore end, pistol grip, hard rubber butt plate, weight about 6 $\frac{3}{4}$ lbs., - - - - - each \$8.00

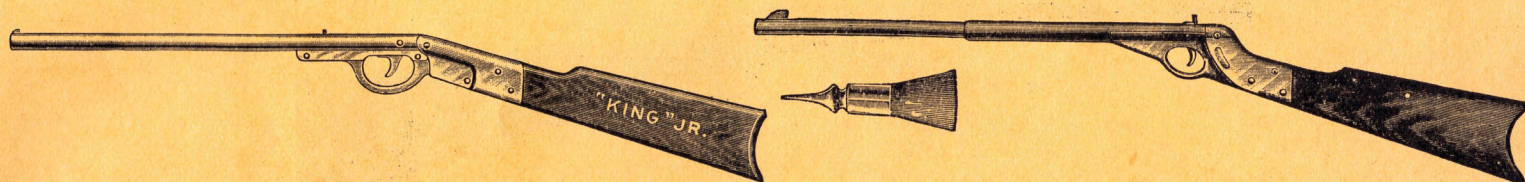

Automatic Ejector.

- No. 95.—12 gauge, 30 inch special steel barrel, choke bored for nitro powder, case hardened frame, top snap action, low rebounding hammer, walnut stock and fore end, pistol grip, checkered, hard rubber butt plate, weight about 6 $\frac{3}{4}$ lbs., - - - - - each \$9.00

Air Rifles

King Single Shot

No. 10.—“The King Junior,” designed especially for younger boys not large enough to use the heavier air rifles, nickel plated steel barrel, black walnut stock, length 29 in., shoots air gun shot with accuracy, weight each 1 lb. 2 ozs., each \$1.00

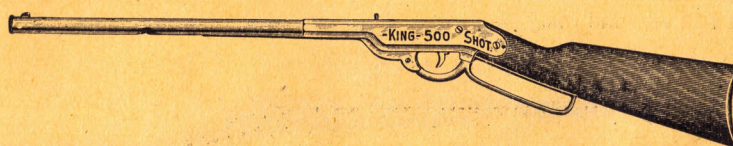

No. 1.—“The King Single Shot,” made of polished steel handsomely nickel plated, genuine black walnut stock, Rocky Mountain front sight, rear peep sight, shoots B. B. shot or darts with accuracy and great penetrating power, length 31 in., weight 2 lbs. - - - each \$1.50

King Repeater

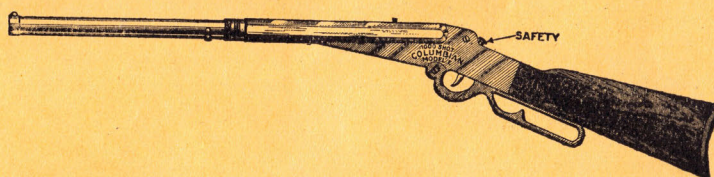

No. 2.—Genuine black walnut stock, barrel and all working parts of steel, nickel plated, shoots 350 times without reloading, does not cut the shot and cannot be clogged, shoots either B. B. shot or darts with accuracy and great penetrating power, length 32 in., weight each 2 lbs. - - - - - each \$1.75

King 500 Shot

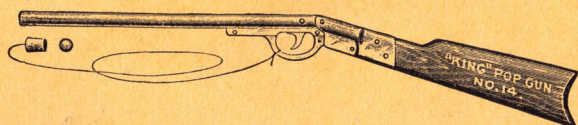

No. 4.—Magazine holds 500 air gun shots, nickel plated steel barrel and frame in one piece, polished walnut stock, accurate sight, lever action, length over all 33 in., weight each 2½ lbs. - - - - - each \$2.00

Columbian 1000 Shot

Model E.—The finest air gun in the world, 3 ft. long, loads by simply pushing the lever, shoots 1000 times with a single charge of the magazine, handles B. B. or air rifle shot, automatic safety, handsomely polished nickel plated steel frame, inside parts of steel and brass, the stock is turned from the finest black walnut, and is highly polished, finished with a formed butt plate, all parts interchangeable, each gun carefully tested for accuracy, weight each about 2½ lbs. - - - - - each \$2.50

King Air and Pop Guns

No. 11.—“Three in One,” a perfect air gun, pop gun, and rubber ball gun combined, shoots air gun shot with accuracy, a large cork on the end of the string which makes a big noise, a rubber ball that will not hurt the furniture, length 29 in. - - - - - each \$0.75

Air Rifle Darts

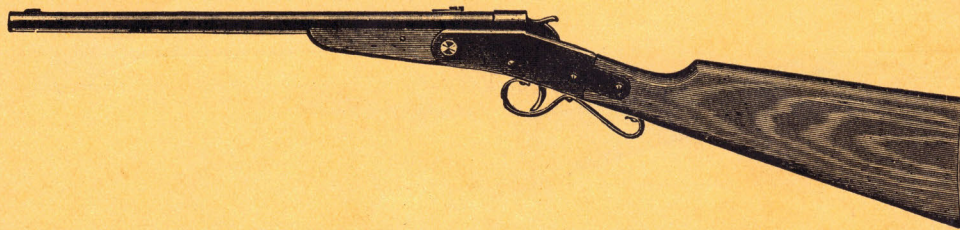

Assorted Colors.—For use at indoor targets, on lawns, etc.,

per doz. - - - - - \$0.60

Rifles.

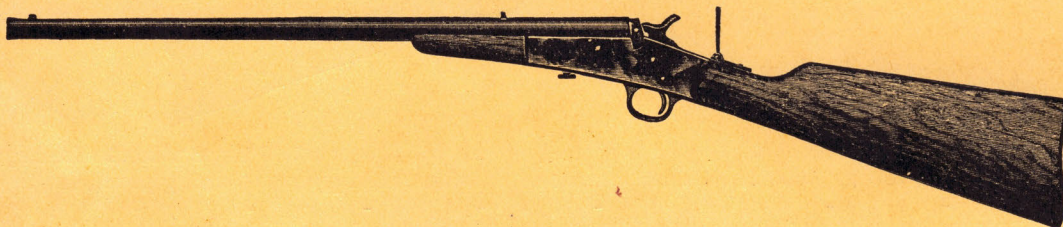

Hamilton.

No. 27.—22 calibre, 16 inch bronze steel jacketed barrel, with front knife and open rear sight, accurately bored and rifled, walnut stock, weight $2\frac{1}{2}$ lbs., - - - - - each \$2.00

A distinctly new type of Hamilton Rifle. It has a hammer action exceedingly simple and of few parts, and an automatic ejector which releases shell when the barrel is "broken down." When the shell is inserted and the barrel closed the thumb-piece is thrown to the right and securely locks barrel, at the same time bringing firing-pin into alignment with hammer. A solid breech-block makes action absolutely safe from rear explosion of a defective shell. The barrel is bronze and rifled with great care under our exclusive patents, and has a built-up steel jacket, making it unsurpassed in strength, durability and accuracy, with no liability of rust from pitting and very easily cleaned.

Remington.

Single Shot 22 or 32 Calibre.

No. 6.—Take down, 20 inch decarbonized steel barrel, tapered, accurately bored and rifled, walnut stock and fore-end, case hardened frame, rifle butt plate, open front and rear and tang peep sight, weight $3\frac{1}{2}$ to 4 lbs., - - - - - each \$4.40

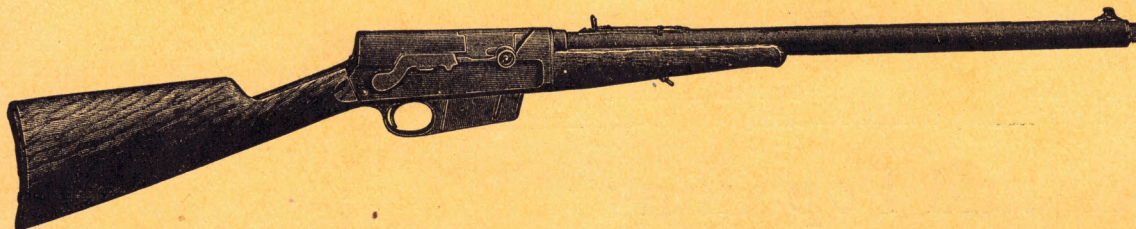

Single Shot, Take Down.

No. 4.—22 calibre, $22\frac{1}{2}$ inch octagon tapered steel barrel, genuine black walnut stock and fore-end, case hardened frame, rifle butt plate, automatic shell ejector, weight $4\frac{1}{4}$ lbs., - - - - - each \$8.80

No. 4.—32 calibre, otherwise same as above, - - - - - " 8.80

No. 4.—32 calibre, 24 inch barrel, otherwise same as above, - - - - - " 8.80

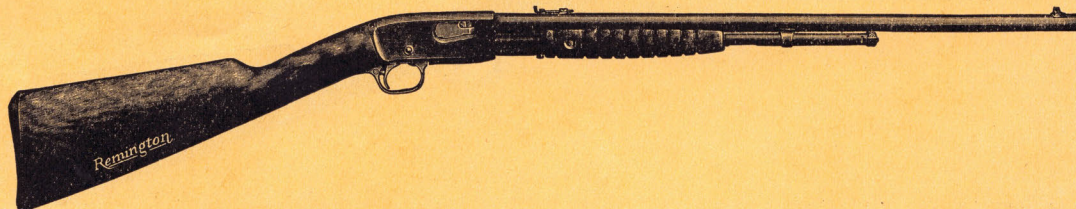

Remington Auto Loading, Five Shots.

No. 1.—35 calibre, standard grade, 22 inch barrel, straight grip, plain walnut stock, shot gun butt, rubber butt plate, blued finish, weight about $7\frac{3}{4}$ lbs., - - - - - each \$35.00

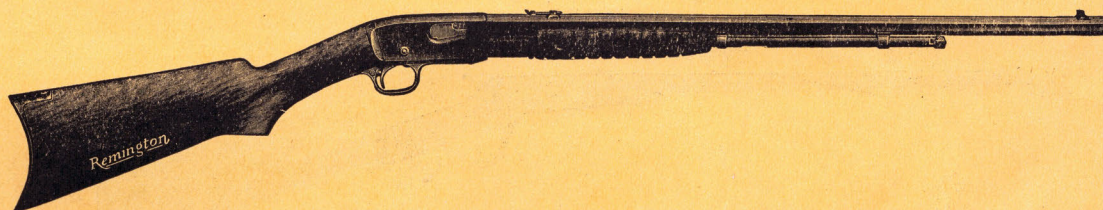

An entirely new sporting rifle, made under the Browning patents, the recoil being utilized to reload, thus reducing the shock to the shoulder and adding to the pleasure of shooting and rapidity with which aimed shots may be fired. The arm is safe, strong, of light weight and handsome design. It has a box magazine, loaded with a clip, it can also be loaded without a clip. The trigger pull is light, and the safety is one of the best ever placed on a rifle. Complete directions how to load with clip, without clip, and how to refill magazine when partly empty, how to use as a single loader, how to take down, how to put together again, accompanying each rifle. A commendable feature is the simple take down system, making the rifle specially convenient for carrying and cleaning. The rapidity of fire with this arm is only limited by the speed the shooter can pull and release the trigger, but it must be understood that pulling the trigger once only fires one shot, and that it must be released and pulled again for each successive shot. After the last cartridge in the magazine has been fired the bolt remains open, thus notifying the shooter that the arm is empty, also saving the time of opening the breech for reloading purposes by hand.

Rifles

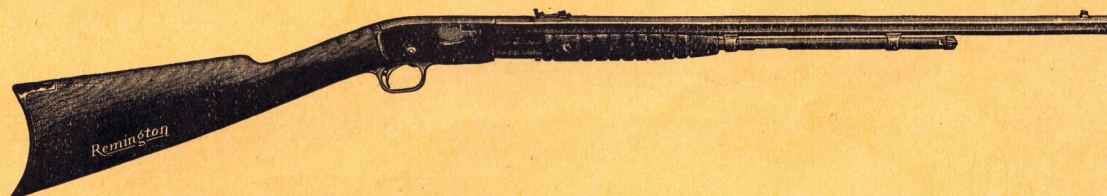

Remington

No. 1.—“The Standard,” hammerless, will handle 22 short, long, and long rifle cartridges, magazine holds 14 short, 11 long or 10 long rifle cartridges, 22 inch round barrel, walnut stock, straight grip, rubber butt plate, weight each $4\frac{1}{2}$ lbs. - - - each \$14.00

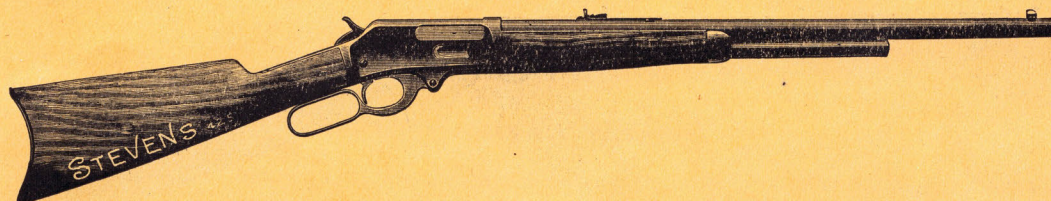

No. 2.—“Gallery Special,” hammerless, chambered for 22 short cartridges only, magazine holds 15 shots, 24-inch octagon steel barrel, walnut stock, pistol grip, fitted with steel rifle butt plate, weight each $5\frac{1}{2}$ lbs. - - - each \$17.50

No. 3.—“Target,” hammerless, will handle either 22 short, 22 long, or 22 long rifle cartridges, magazine holds 15 short, 12 long, or 11 long rifle cartridges, 24-in. octagon steel barrel, walnut stock, straight grip, fitted with steel rifle-butt plate, weight each $5\frac{1}{2}$ lbs., each \$17.50

The above three Remington, solid breech, hammerless repeating rifles are the latest addition to the modern Remington idea. They are modelled after the line of the Remington pump gun, which has established the reputation of having the most graceful lines of any repeating arm on the market. The action is strong and simple with positive extraction and feed and the absolute locking of the action when cocked. The elimination of the hammer insures safety from accidental discharge. The ejected shell is shot out on the side away from the shooter and in no way interferes with him in rapid shooting.

Stevens High Power

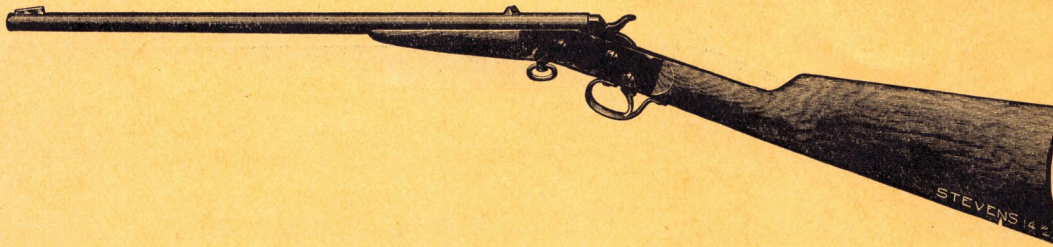

No. 425.—25-35, 30-30, or 35 Caliber, six shots, 22-inch round nickel steel barrel, solid blued steel receiver, coil main spring action, walnut stock checkered steel-butt plate, walnut fore-end with blue steel cap, German silver blade front and sporting rear sights, weight about 7 lbs. - - - each \$27 50

This rifle embodies beauty of design with a most simple mechanism and is designed especially for high power ammunition. Absolute safety is guaranteed and premature discharge is impossible.

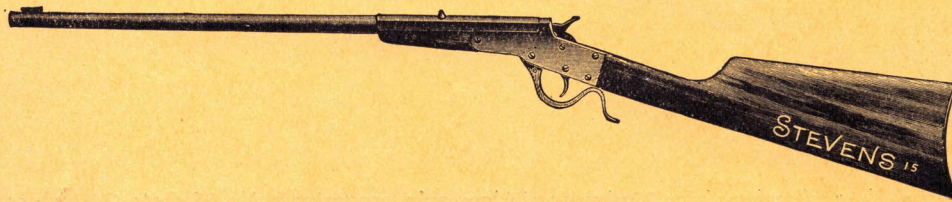

Stevens' Rifles

Little Scout

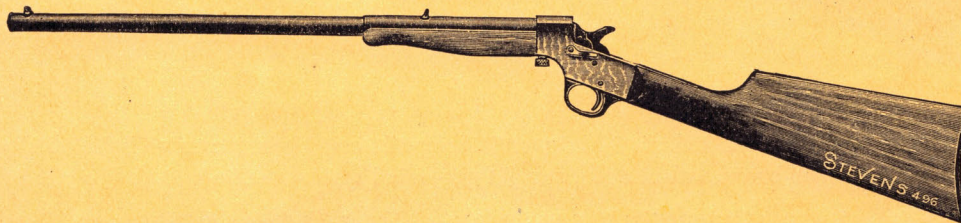

No. 14½.—22 calibre, Take Down, 18 inch round barrel, case hardened frame, blued steel butt plate, German silver knife edge front and open rear sights, adapted for C.B. caps, 22 short, 22 long, or 22 long rifle rim fire cartridges, weight each $2\frac{3}{4}$ lbs. - each \$3.00

Maynard Junior

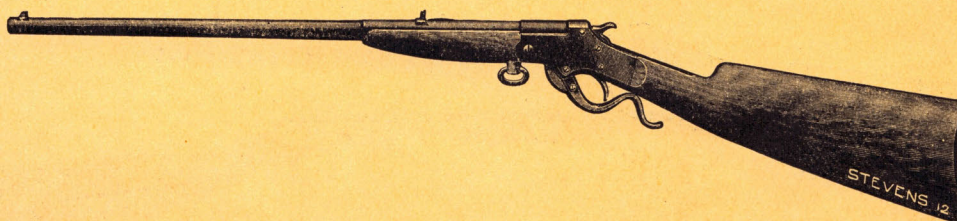

No. 15.—22 calibre, 18 inch half octagon barrel, case hardened frame, blued steel butt plate, German silver knife edge front and open rear sights, adapted for C.B. caps, 22 short, 22 long, or 22 long rifle rim fire cartridges, weight each $2\frac{3}{4}$ lbs. - - each \$4.00

Crack Shot

No. 16.—22 calibre, Take Down, 20 inch round barrel, case hardened frame, walnut stock and fore-end, rubber butt plate, bead front and open rear sights, adapted for C.B. caps, 22 short, 22 long, or 22 long rifle rim fire cartridges, weight each $3\frac{3}{4}$ lbs. - each \$4.50

Favorite

No. 17.—22, 25 or 32 calibre, Take Down, 22 inch half octagon barrel, case hardened frame, plain lever action, walnut stock with shot gun butt plate, walnut fore-end, Rocky Mountain front and No. 112 sporting rear sights, weight each $4\frac{1}{4}$ lbs. - - each \$7 00

We cannot speak too highly of the above line of single shot rifles. They have each of them in turn established a new standard in the art of small rifle making. The Favorite continues to hold first place as the most popular and most accurate low priced rifle that has ever been produced.

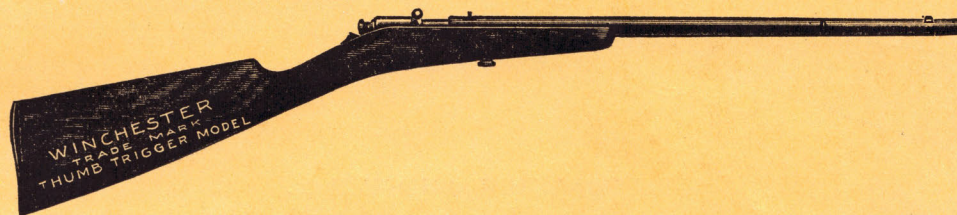

Winchester Rifles.

Model 1902, Take Down Single Shot.

22 Calibre, 18-inch round steel barrel, carefully bored and rifled, straight grip stock, blued steel butt-plate, open or peep sights, bolt action, weight about 3 lbs., - - - - - each \$5.00

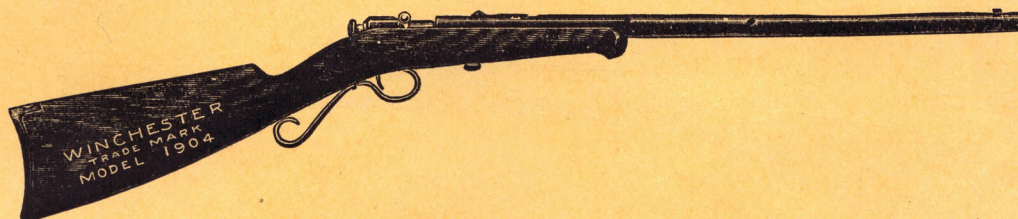

Thumb Trigger, Take Down, Single Shot.

22 Calibre, 18-inch round steel barrel, highly finished, straight grip stock, checkered rubber butt-plate, Winchester patent front sight and open rear sight, bolt action, weight $2\frac{3}{4}$ lbs., - - - - - each \$4.50

The Winchester Thumb Trigger Model is a novelty in 22 calibre rifles. It has the same simple and reliable bolt action which made the Winchester Model 1902 such a popular gun, and caused it to be so widely imitated. It will handle either 22 short or 22 long rim fire cartridges.

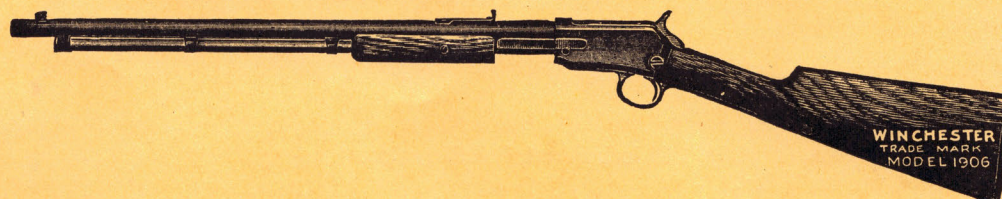

Model 1904, Take Down, Single Shot.

22 Calibre, 21-inch heavy round steel barrel, highly finished Schnetzen shaped stock, blued steel butt-plate, bolt action, rebounding lock, bright alloyed-tip bead front and adjustable rear sights, weight about 4 lbs., - - - - - each \$6.60

The length of this gun over all is $37\frac{1}{2}$ inches, and it is made with the popular and widely imitated Winchester bolt action with rebounding lock, and will handle 22 short and 22 long rim fire cartridges.

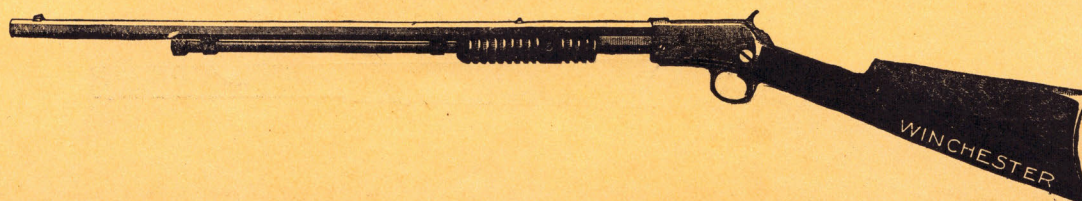

Model 1906, Take Down, Repeating.

22 Calibre, 20-inch round steel barrel, handsome straight grip stock, rubber butt-plate, sporting front and adjustable open rear sights, magazine holds 15 cartridges, weight 5 lbs., - - - - - each \$12.00

This is a compact, lightweight, take down rifle, handling 22 rim fire cartridges. It is most attractive in appearance and outline, and in accuracy, reliability of operation and finish, it is fully up to the established Winchester standard.

Model 1890, Take Down, Repeating.

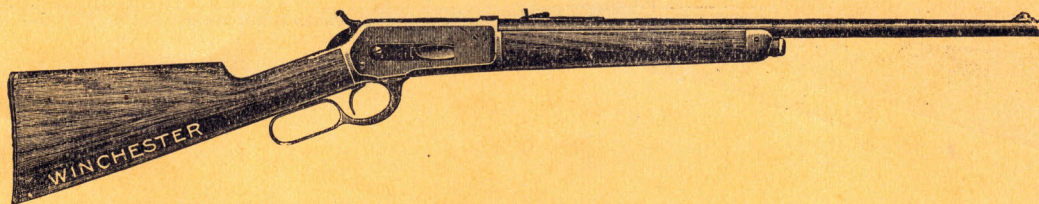

22 Calibre, 24-inch octagon steel barrel, straight grip stock, not checkered; three sizes, 22 short, 22 long and 22 W.R.F.; in ordering state which size is wanted, weight 6 lbs., - - - - - each \$16.00

This action of this model is simple and strong. The parts are few in number and interchangeable. The breech block locks itself in plain view, and is of such a size as to permit the use of a strong firing pin and extractor, and also to offer a good covering for the head of the cartridge.

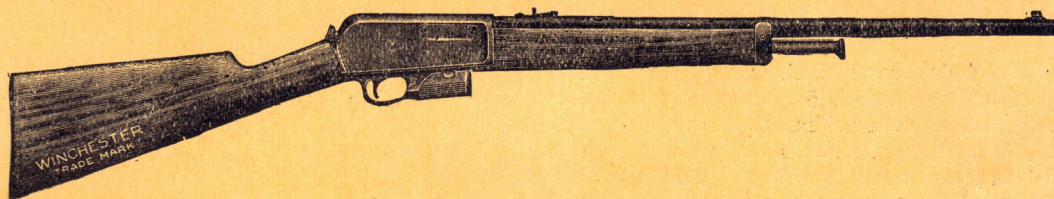

Winchester Rifles.

Model 1886.

33 Calibre, 24-inch round steel barrel, 8 shots, weight $7\frac{3}{4}$ lbs.	-	-	-	-	-	-	-	each \$29.00
33 Calibre, take down, otherwise same as above	-	-	-	-	-	-	-	" 32.50

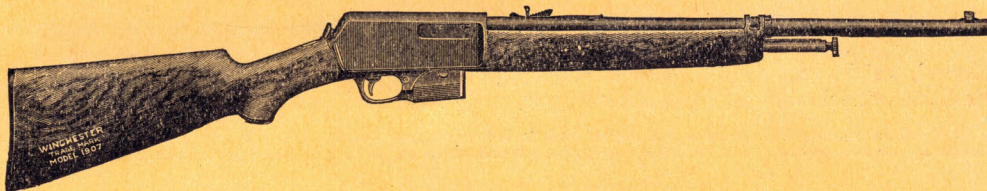

Model 1905, Self Loading.

32 Calibre, 22-inch round barrel, straight walnut stock, 6 shots, weight $7\frac{1}{2}$ lbs.,	-	-	-	-	-	-	-	each \$28.00
35 Calibre, 22-inch round barrel, straight walnut stock, 6 shots, weight $7\frac{1}{2}$ lbs.,	-	-	-	-	-	-	-	" 28.00

This is the first rifle of the self-loading type made for centre fire ammunition. The 32 calibre shoots 165 grain bullet, and the 35 calibre shoots 180 grain bullet. As its name indicates, this rifle is self loading. The recoil of the exploded cartridge ejects the empty shell, cocks the hammer, and feeds a fresh cartridge from the magazine into the chamber, leaving the rifle ready to shoot when you again pull the trigger. By inserting cartridge into the chamber before placing the loaded magazine in the gun, the operator has six (6) shots at his disposal. The model is exactly similar to the 1907 Model listed below, except that the 1907 Model is adapted to a much more powerful cartridge. Full directions as to the operation of this model, as well as Model 1907, are given below.

Models 1907 and 1910, Self Loading.

351 Calibre, high power, take down 20 inch round nickel steel barrel, plain walnut pistol grip stock and fore arm, not checkered, six shots, weight about $7\frac{3}{4}$ lbs.,	-	-	-	-	-	-	-	each \$28.00
401 Calibre, muzzle velocity 2142 foot seconds, energy at muzzle 2038 lbs., the most powerful recoil operated repeater made, otherwise same as above, weight $8\frac{1}{4}$ lbs.,	-	-	-	-	-	-	-	each 30.00

A SIMPLE TWO-PART TAKE-DOWN. The Two-part Take-down system used on these rifles is simple and strong. By turning the Take-down screw, found at the rear of the receiver, a few times the rifle separates into two parts, the stock and guard being in one part and the barrel and receiver in the other. When the rifle is taken down the working parts are accessible for cleaning. The rifle can be put together as easily as it is taken down, there being nothing about the action of the bolt or other parts to interfere with this process.

A SAFE STRONG AND RELIABLE SYSTEM. The Winchester Self-loading system is positive, safe, strong and simple. The working parts are few and strong and there is nothing complicated about the rifle, and it will not get out of order with any reasonable use. The barrel is stationary like that on an ordinary rifle, and the sights are attached directly to it, as is necessary for the greatest accuracy. The receiver is as "clean as a hound's tooth," being free from pins or screws to jar out or shake loose. There are no moving parts on the outside of the rifle to catch in the clothing or tear the hands. The Model 1910 is a handsome, well balanced gun that is easily loaded and unloaded, easily shot with great rapidity and easily taken down and cleaned. Its strength, power and compactness make it a desirable, handy and handsome rifle for big game shooting.

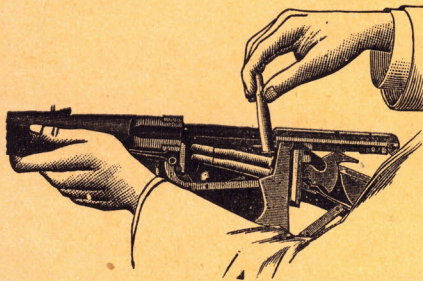

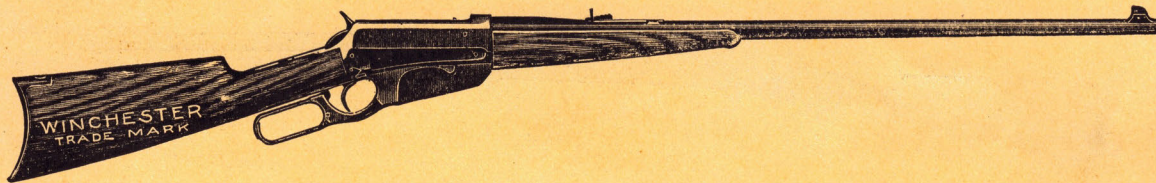

The standard gun is equipped with sporting front and rear sights. It measures in length over all 38 inches. The pistol grip stock, finished with a rubber butt plate, is 13 7-8 inches long and has a drop of 1 3-4 inches at the comb and of 2 3-4 inches at the heel. Only 20-inch round nickel steel barrels can be furnished on these rifles.

THE .401 CALIBRE CARTRIDGE. Compared with the popular .45-70 Government or the .30 U. S. Army, the more recent favorite of big game hunters, the .401 cartridge looks small. In bulk it is only about half as large, but when it comes to hitting a knock-down blow or tearing a great big hole in animal tissue, it easily distances these two less modern cartridges. The .401 calibre cartridge with its little bulk, yet greater power, is the result of Winchester experience and knowledge in ammunition making, which led to taking advantage of the advancement in the art of manufacturing smokeless powder when it produced a very dense powder giving great velocity, yet generating pressures not unsafe for arms constructed to handle it.

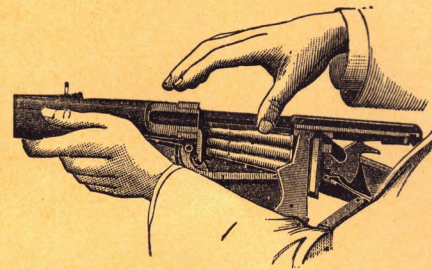

Winchester Rifles.

Model 1895.

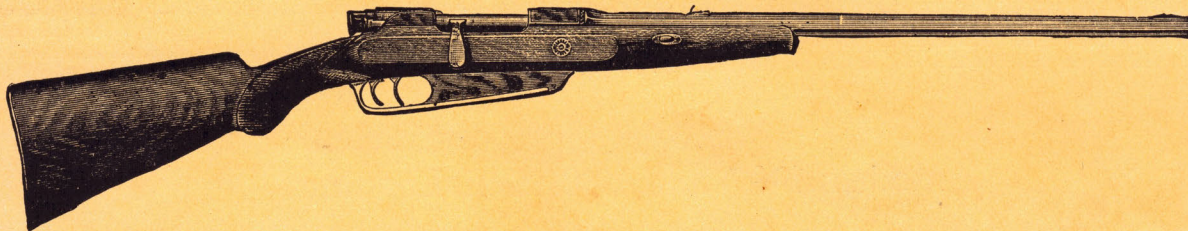

This is the first box magazine, lever action gun, ever put upon the market. It is light in weight, handsome in form, and the moving parts are few and strong.

The disposition of the magazine and parts is such that the gun can be readily used as a single loader, keeping the magazine in reserve. The mechanism of the system can be easily understood by examining the sectional cuts.

405 Calibre, 24-inch round nickel steel barrel, 5 shots, weight $8\frac{1}{2}$ lbs.,	-	-	-	-	-	each \$30.00
35 Calibre, 24-inch round nickel steel barrel, 5 shots, weight $8\frac{1}{4}$ lbs.,	-	-	-	-	-	" 30.00
303 Calibre, British, 28-inch round nickel steel barrel, 6 shots, weight $8\frac{1}{4}$ lbs.,	-	-	-	-	-	" 30.00

30 Calibre, U.S. Army, 28-inch round nickel steel barrel, 6 shots, weight $8\frac{1}{4}$ lbs.,	-	-	-	-	-	" 30.00
30 Calibre, U.S. Army Carbine, 22-inch round nickel steel barrel, 6 shots, weight 8 lbs.,	-	-	-	-	-	" 30.00

Mannlicher Rifles.

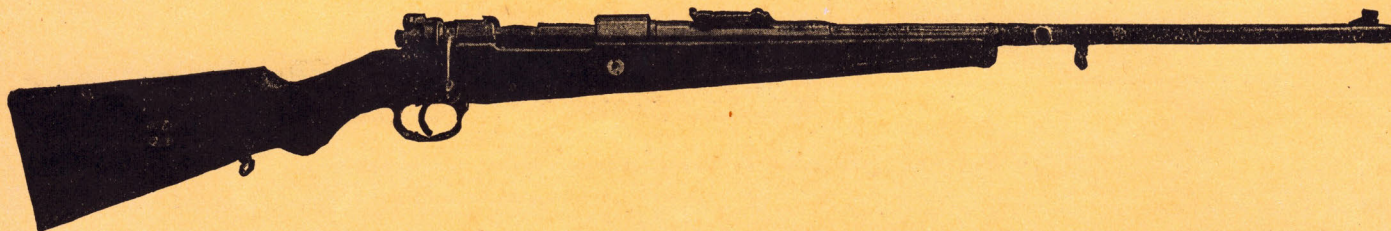

Adapted to Smokeless Powder High Power Central Fire Cartridges, With Nickel Mantled Bullets; Calibre 8 m/m.

No. 3.—Plain finished round barrel, weight each $6\frac{1}{2}$ lbs., without hair trigger,	-	-	-	each \$35.00
No. 2.—Plain finished octagon barrel, checkered pistol grip, hair trigger, weight each $6\frac{3}{4}$ lbs.,	-	-	-	" 45.00

This arm is used exclusively by the German and Austrian armies and differs only in being sporting finish. It has immense velocity, is strong, simple in construction and is beautifully finished. It can be readily assembled in a few minutes time. All parts are accurately made to gauge and are interchangeable.

Mauser Rifles.

Model 1908.

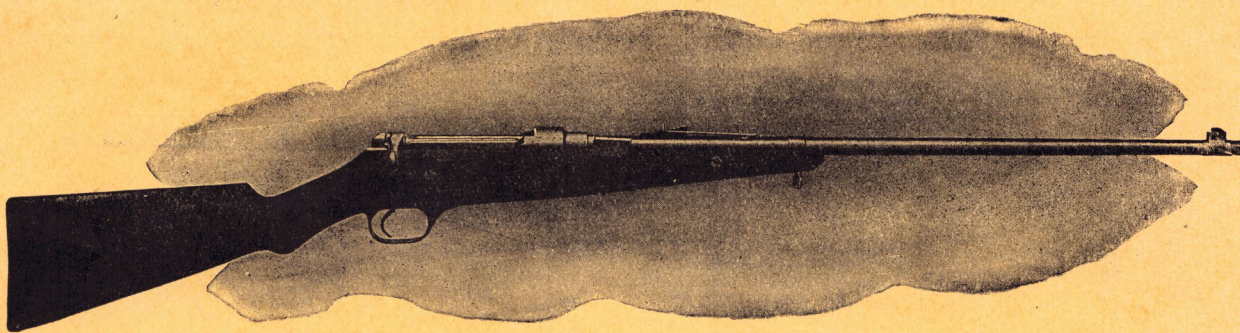

Sporting Model. —Calibre 7.9 m/m, 24 inch Krupp's fluid steel barrel, blued steel mountings, selected walnut stock, half pistol grip, checked, sporting rear sight, fitted with sling swivels, 5 shots, weight each $7\frac{1}{4}$ lbs.,	-	-	-	each \$45.00
---	---	---	---	--------------

This rifle embodies the latest patents of the celebrated inventor Herr. Geheirat Mauser, such as self locking device, lock plate for protection of the back acting of the powder gases and the latest lock and breech bolt improvements. The rifle can be loaded singly or with five cartridges contained in a clip. The magazine is flush with the frame and closed below so that no dirt can enter the action.

Ross Rifles.

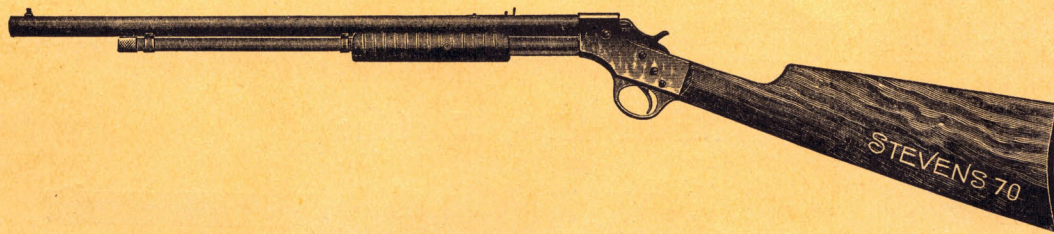

Straight Pull, Sporting.

Model R.—303 Calibre, .215 grain bullet, 22 or 26 inch round barrel, Italian walnut stock, Rocky Mountain rear and Ross Hunting fore sight, five shots, weight each $6\frac{1}{2}$ lbs., each \$27.00

This is a Canadian made rifle of the very highest class, embodying every essential and desirable feature of the modern arm. The barrel is of the finest and choicest grade of steel. It is handsome, durable and effective and in appearance and general finish compares very favorably with much higher priced weapons. The Ross rifle made an enviable reputation for itself at the last meet at Bisley.

Stevens Rifles.

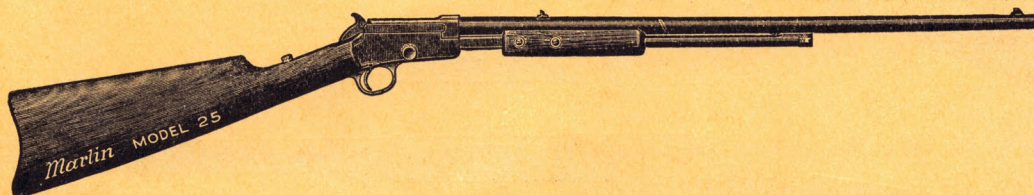

Visible Loading, Handling 22 Short, Long or Long Rifle Cartridges.

No. 70.—22 Calibre, 20 inch round steel barrel, varnished stock and slide handle, case hardened frame, rubber butt plate, fitted with bead front and sporting rear sight, 15 shots, weight each $4\frac{1}{2}$ lbs., each \$9.00

The visible loading feature in this rifle is entirely new and so simple that it will instantly appeal to the shooter. Magazine tube and breech block are in one piece, the hammer has a positive lock and the gun is furnished with extra strong double extractors.

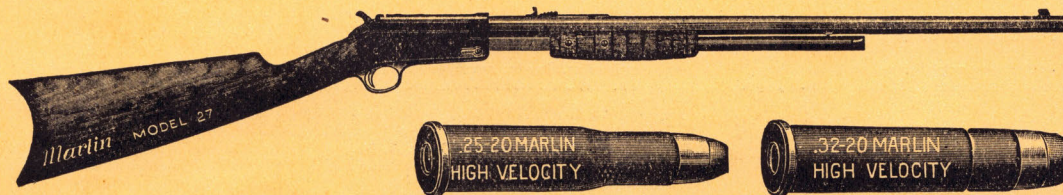

Marline Rifles.

New Model Take Down Rim Fire, Handling 22 Short or C.B. Caps.

No. 25.—22 Calibre, 23 inch round barrel, black walnut stock, steel butt plate, frame of best quality steel, blued finish, weight each 4 lbs. 2 oz., each \$12.00

This is a very thorough repeating rifle in every way, guaranteed in accuracy and reliability. It will be found an excellent arm for small game and short range work. The ammunition that it handles is the cheapest made and you quickly save the price of your rifle. The rifle takes down without tools by removing the tang thumb screw.

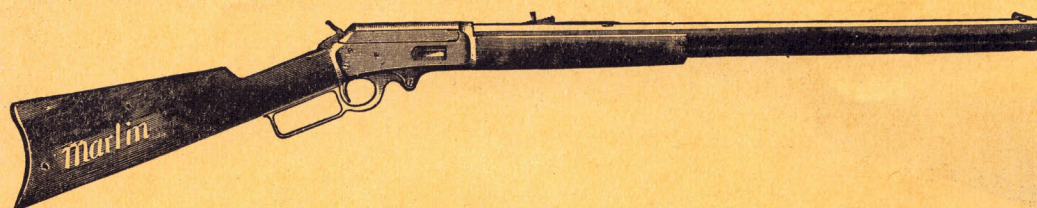

New Model 27, Take Down Repeating, Octagon Barrel, Seven Shots.

25-20 Calibre, 24 inch smokeless steel barrel, blued frame, blued steel rifle butt plate, black walnut stock and fore end, Rocky Mountain rear and ivory bead front sights, length over all $42\frac{1}{4}$ inches, weight $5\frac{3}{4}$ lbs., each \$18.00
32-20 Calibre, otherwise same as above, " 18.00

The Model 27 is built extra strong throughout on account of the high velocity smokeless loads. The receiver and action parts are all cut from the solid steel drop forgings; the buttstock, fore-arm and all other parts are of first quality material throughout. Note the shapely stock and special rifle buttplate. This gun is guaranteed free from imperfection in material and workmanship. The deep, clean-cut Ballard rifling develops the full range and power, and insures the greatest possible accuracy and a long life for the gun.

Marlin Repeating Rifles.

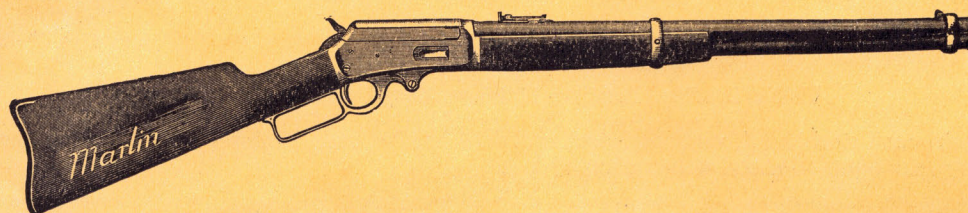

Model 1894.

25-20 Calibre, 24 inch round barrel, 14 shots, weight 7 lbs.,	-	-	-	-	-	-	each \$19.00
25-20 Calibre, 24 inch octagon barrel, 14 shots, weight 7 lbs.,	-	-	-	-	-	-	" 20.00
38-40 Calibre, 24 inch round barrel, 14 shots, weight 7 lbs.,	-	-	-	-	-	-	" 19.00
38-40 Calibre, 24 inch octagon barrel, 14 shots, weight 7 lbs.,	-	-	-	-	-	-	" 20.00
44-40 Calibre, 24 inch round barrel, 14 shots, weight 7 lbs.,	-	-	-	-	-	-	" 19.00
44-40 Calibre, 24 inch octagon barrel, 14 shots, weight 7 lbs.,	-	-	-	-	-	-	" 20.00

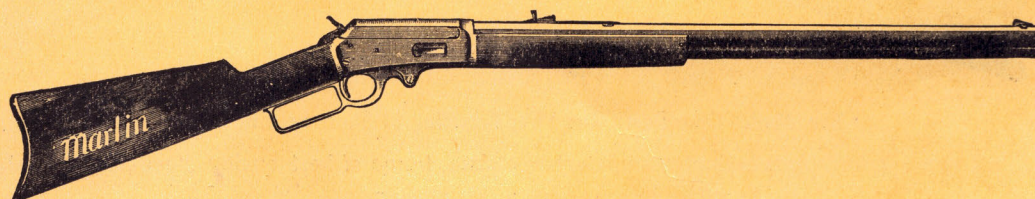

This model without doubt furnishes the finest repeating rifle on the market, of medium weight, using accurate and powerful cartridges. The action is simple and compact; there are no projecting notches, no loose parts to catch any obstructions, neither is the gun in any way open so as to catch rain, dirt, twigs, etc. The balance of this rifle is perfect: in finish it is excelled by no rifle on the market, of any type whatsoever.

Model 1894, Carbine.

38-40 Calibre, 20 inch round barrel, 12 shots, weight 5 $\frac{3}{4}$ lbs.,	-	-	-	-	-	-	each \$18.00
44-40 Calibre, 20 inch round barrel, 12 shots, weight 5 $\frac{3}{4}$ lbs.,	-	-	-	-	-	-	" 18.00

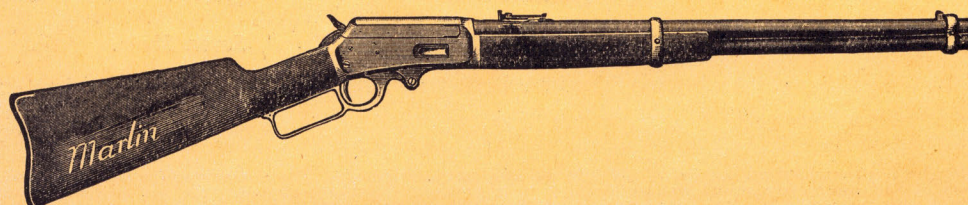

Model 1893.

25-36 Calibre, 26 inch, nickel steel round taper barrel, 10 shots, weight 7 lbs.,	-	-	-	-	-	-	each \$21.00
30-30 Calibre, 26 inch, nickel steel, round taper barrel, 10 shots, weight 7 lbs.,	-	-	-	-	-	-	" 21.00
30-30 Calibre, 26 inch, nickel steel octagon taper barrel, 10 shots, weight 7 $\frac{1}{2}$ lbs.,	-	-	-	-	-	-	" 22.00

These rifles are suitable for use with black powder ammunition and equivalent loads, such as low power smokeless, and are made to meet the wants of the many shooters who don't care enough for the Smokeless Steel Barrel to pay the extra price. We do not recommend this grade for High Power Smokeless Ammunition.

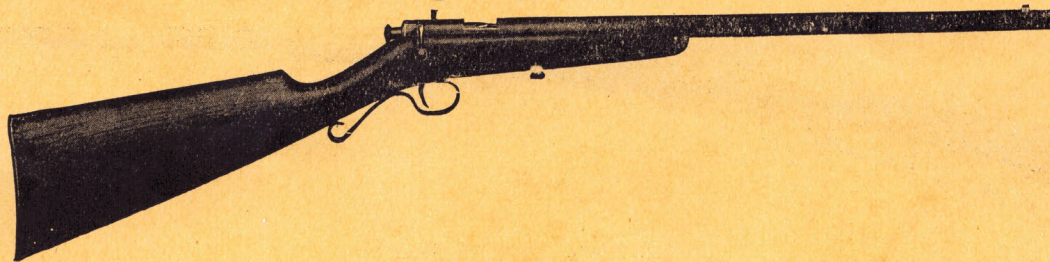

Model 1893, Carbine.

30-30 Calibre, 20 inch round steel barrel, 7 shots, weight 7 lbs.,	-	-	-	-	-	-	each \$20.00
--	---	---	---	---	---	---	--------------

Savage Rifles

Junior Single Shot, Model 1904.

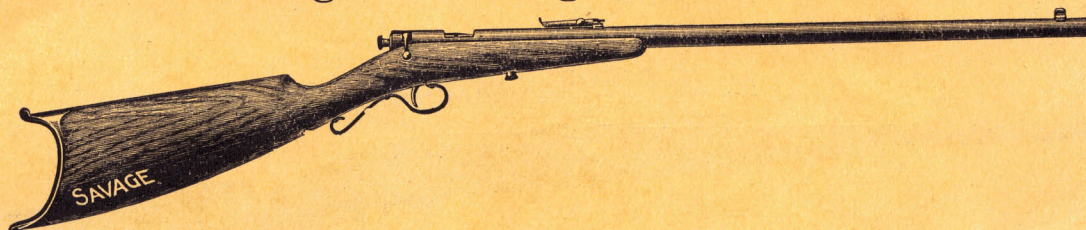

Take Down

22 Calibre, 18 inch heavy round steel barrel, nicely tapered, American walnut stock, nicely finished, weight 3 lbs. - - - each \$5.50

The Savage "Junior" is different from any rifle you ever saw. Its outward appearance may seem similar to other rifles of this type, but that is not the point. It is in the quality and the smooth and easy manner with which it works that actually counts. Besides being the safest and most accurate shooter, it is beautifully finished and sold under an honest guarantee.

Single Shot Target, Model, 1905

Take Down

22 Calibre, 22 inch heavy round steel barrel, Swiss butt plate, adjustable trigger pull, ivory bead front and Savage micrometer rear sights, weight 4 $\frac{3}{4}$ lbs. - - - - - each \$8.50

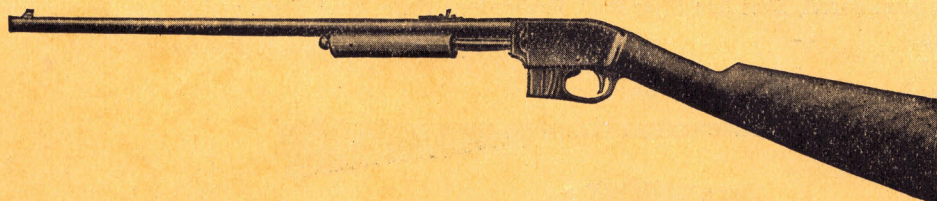

Repeater, New Model 1911

25-35 Calibre, weight $7\frac{1}{4}$ lbs.	-	-	-	-	-	-	-	each	\$25.00
30-30 Calibre, weight $7\frac{1}{4}$ lbs.	-	-	-	-	-	-	-	"	25.00
303 Calibre, weight $7\frac{1}{4}$ lbs.	-	-	-	-	-	-	-	"	25.00

Featherweight, Take Down

20-Inch Savage High Pressure Steel Barrel, Shot Gun Style Butt, Rubber Butt Plate, Bead Front and Savage Micrometer Rear Sights, 6 Shots

25-35 Calibre, weight each 6 lbs.	-	-	-	-	-	-	-	each	\$30.00
30-30 Calibre, weight each 6 lbs.	-	-	-	-	-	-	-	"	30.00
303 Calibre, weight each 6 lbs.	-	-	-	-	-	-	-	"	30.00

The above cut illustrates the Take Down feature of the Savage Featherweight. This rifle has a number of new and exclusive features, the chief of which being the interchangeable barrel, whereby the operator can change the calibre of his rifle by simply removing the fore-end and substituting one barrel for another without any further adjustment of the arm. Thus does the sportsman not only get a variety of calibres, but one of the lightest, most compact and most powerful arms on the market, so that he is equipped for game of any size or description.

Description of the Savage Rifles Listed Above

These rifles have a solid breech bolt that supports the recoil in the direct line of fire, and which effectually prevents any powder gas from escaping to the rear of the breech mechanism. The operator is protected by a solid wall of steel, there being no open communication to the rear; the Savage is the only rifle on the market so constructed.

The action of these rifles cannot be blown open: the entire system is locked by operating the trigger and lever bolt. They are very simple, having few springs and parts, are light, have an easy, smooth short action, and can be quickly and accurately operated from the shoulder.

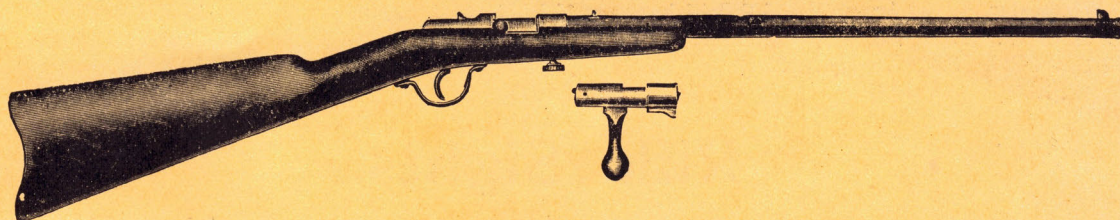

They can be rapidly used as a single loader independently of the magazine, the number of cartridges in the magazine is automatically shown by numerals and can be held in reserve while using the rifle as a single shot.

The magazine holds the cartridges apart from each other and side by side; no bullets touch the primers of other shells, and both magazines and cartridges are inside of and protected by the steel walls of the receiver.

The perfect balance of these rifles, the simplicity and easy working of the action, the absence of all knobs or protuberances, or the projection of the magazine below the line of the frame have called forth universal commendation. They are accurately and finely fitted, the barrel is blued, the frame blued and polished, and the lever and butt plate case-hardened. They have fine walnut stocks, and are furnished with sporting front and rear sights.

Rifles

"Unique" Take Down

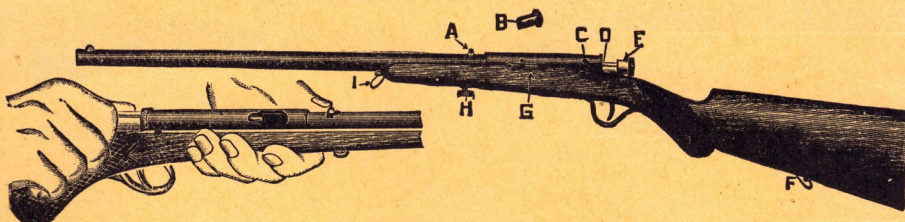

Single Shot

No. 354D.—22 Calibre, 18 inch carefully bored round steel barrel, straight grip stock, open front and rear sight, bolt action, weight each 3 lbs. each \$4.00

This is the cheapest bolt action single shot rifle sold, and is, at the same time, a sturdy and serviceable weapon

'Bayard' Semi-Automatic

Single Shot

22 Calibre, Handles 22 short smokeless rim fire cartridges only, 24 inch round steel barrel carefully bored, walnut stock, pistol grip, shot gun butt, weight each 4 lbs. each \$7.00

Similar to the self-loading pistol the pressure of the explosion gas is used to push the breach block backward, eject the empty shell, and cork the firing pin. After each shot, the breach remains open making it necessary only to drop a new cartridge into the breach opening, press the button of the breach block catch and the rifle is again ready to fire. It has an extremely simple breach mechanism, is easily taken apart for cleaning, and we can safely say that no rifle on the market is its equal in workmanship, accuracy and ease of manipulation and cheapness.

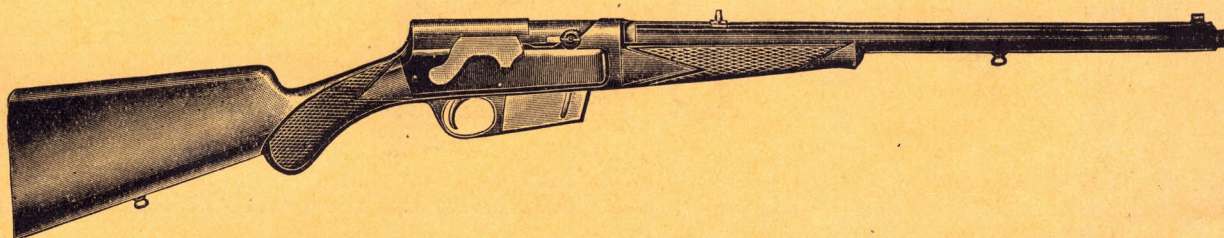

A.—Adjustable rear sight
B.—Empty shell ejected

C.—Safety latch
D.—Screw cap holding breach block

E.—Breach block
F.—Sling swivels

G.—Breach block catch
H.—Take down screw

Browning Automatic

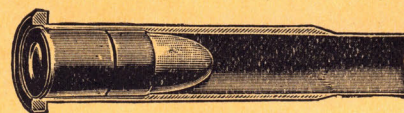

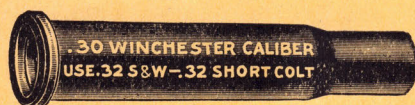

Hammerless, Solid Breech, Take Down, Five Shot Repeater, Model 1910

35 Calibre, 22½ inch Krupp's fluid steel barrel, matted rib, fitted with the most modern sights, frame and all working parts solid drop forgings, fine Italian walnut stock, shot gun pattern with rubber butt plate, fitted with swivels, length over all 41 inches, magazine holds 5 shots. Weight with magazine empty 8½ lbs. each \$42.00

The attention of sportsmen and dealers is called to this, the most perfect automatic rifle yet produced, comprising all of the latest patents of the famous inventor J. M. Browning. The Ballistic Table of this rifle is interesting reading to the expert. The weight of the cartridge is 383 grains, weight of bullet 200 grains, weight of charge 38½ grains, muzzle velocity 2175 foot seconds, muzzle energy 2090 foot lbs., penetration in solid pine at 25 yards 7½ inches: at this distance the bullet will also penetrate a sheet of steel ½ of an inch thick and a pine board 4½ inches thick.

Lyman Rifle Sights.

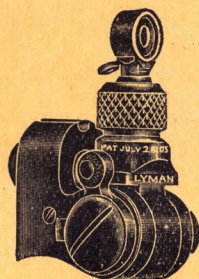

The optical principle involved in Lyman rear sights is quite novel in its application, and is clearly illustrated by the above cut.

When aiming, the Lyman Rear Sight has the appearance of a ring or hoop, which shows the front sight and the object aimed at, intercepting no part of the view.

The above cut gives an approximate idea of the sight when aiming. It will be noticed that the top of rifle barrel, front sight and game, are seen as distinctly as though no rear sight were used.

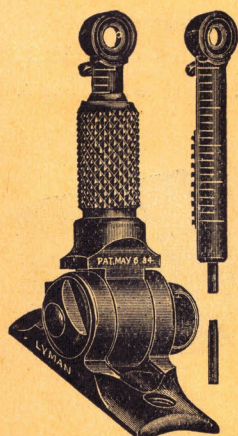

The great feature of this sight is that the eye is guided, without any change of focus or effort, to see more than is seen when shooting without a rear sight. This is accomplished by a slight, but sufficient, interference of the vision of the aiming eye by the rim of the sight. The reason that the view is not obscured in any direction is that the pupil of the eye is about the same diameter, in ordinary lights, as the rim of the sight is wide, and the eye sees nearly around it.

Combination Rear.

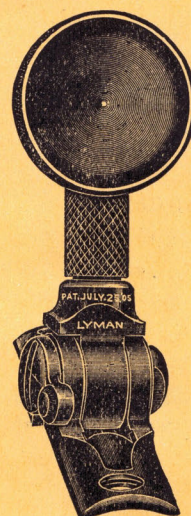

No. 1—For Remington No. 7 only - each \$3.00

These sights are the same as regards joints, sleeves and stems, as the regular Nos. 1 and 2 Rear Sights which we make for rifles on which they are fitted to the tangs, but have a base made with threads, which can be easily attached to the end of the firing bolts on rifles of this model.

This cut shows the No. 1 Rear Sight and its Stem with the small stop-pin at the end. After the sight is attached to the rifle, it should be tested at fifty yards for "point blank" shooting. When the sight is adjusted for the distance, mark the sight stem slightly at the top edge of the sleeve. Then turn the stem out and drive the pin into the hole at the end. Screw the sight stem back, and if it is above the mark which was made, remove it again and file the pin shorter, until it is correct for shooting at fifty yards.

No. 1—Combination Rear Sight, for Marlin models '94, '92, '97, '93 in 38-55 calibres, and '93 in 30-30 and 25-36 calibres, Winchester models '86, '90, '94 in 25-30 and 30-30 calibres, and '94 in 38-55 and 38-56 calibres, Savage in 303 calibres, Colt's in 30-30 calibres, Stevens Ideal and Favorite, in 22 calibre, - - each \$3.00

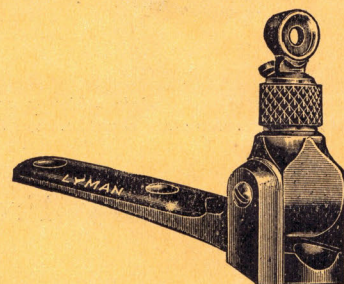

Combination Rear With Cup.

No. 2—For Marlin models '92, '93, Winchester '94, Savage 303 and 30-30 calibre, each \$3 50

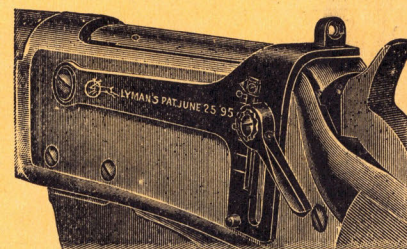

This sight has a large detachable disc, and is intended for Match Rifles and Gallery Rifles. It is not as good for "all round" shooting as the No. 1 combination rear sight. Many target shooters like it, however, for it is much better than the ordinary peep sight.

Combination Rear For Savage Rifles.

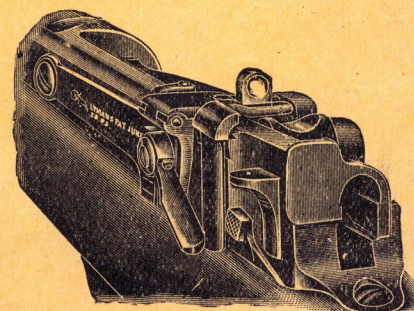

No. 1—For Savage rifles only, 303, 30-30, 25-35, 32-40 and 38-55 calibres, - - - each \$3 00

Patent Receiver Rear.

No. 21—For Winchester models '86, '92, '94 and '95, Marlin models '93 and '95, Savage 303, 30-30, 25-35, 32-40, 38-55 calibres, - - - each \$3.50

No. 25—For the Winchester Lee Straight Pull Rifle, each \$5.00

Lyman Rifle Sights.

Ivory Bead Front.

No. 3

No. 4

No. 20

No. 28

- No. 3.—Standard, 22 calibre Marlin, Winchester and Colt's,
30-30 Marlin, Savage and Winchester, 303 Savage and
Stevens' Favorite, - - - each \$1.00
- No. 4.—Hunting Front, - - - " .50
- No. 20.—Jack Sight for quick shooting, - - - " 1.00
- No. 28.—Semi-Jack, - - - " 1.00

This sight gives the sportsman a clear white bead, which can be seen distinctly against any object, in the woods or in the bright sunlight. The contrasting black neck of the sight makes the bead all the more prominent.

Slot Blank.

- No. 12.—Each, - - - - - \$0.25

Blank piece to replace the rear crotch sight which is usually on the barrel when the rifle is purchased. This crotch sight should always be removed.

Combination Ivory Front.

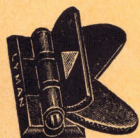

Used with Globe.

Used with Ivory.

- No. 5.—Standard, 22 calibre Marlin, Winchester and Colt's,
30-30 Marlin, Savage and Winchester, 303 Savage and
Stevens' Favorite and Ideal, - - - each \$1.00

Patent Leaf.

Using straight bar.

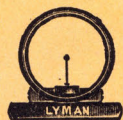

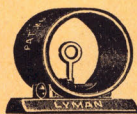

Both leaves folded down.

Using the crotch.

- No. 6.—Leaf, standard Winchester model '94 in 30-30 and
25-35 calibres only, also Savage and Colt's, each \$1.00

Target Front.

- No. 17.—With reversible aperture and globe for target and
gallery shooting, - - - each \$1.50

Patent Ivory Bead Front.

No. 24

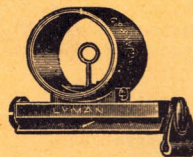

No. 32

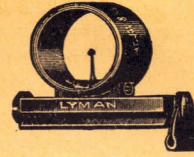

No. 26

- No. 24.—"Jack" made for the following rifles only: Winches-
ter model 1895 rifle, 30 U.S.A. and 303 British calibres;
Winchester carbines, Lee straight pull rifle, Remington
Lee sporting rifles, - - - each \$0.50
- No. 32.—"Semi-Jack," otherwise same as above, " .50
- No. 26.—Ivory bead, otherwise same as above, " .50

Windgauge Target Front.

Showing Aperture.

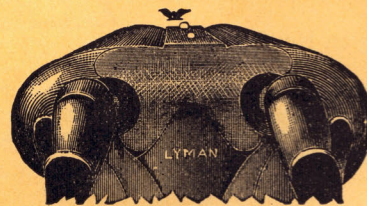

Showing Globe.

- No. 7.—For target or gallery, - - - each \$3.50

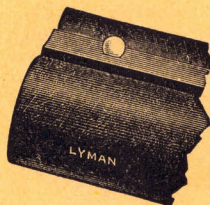

This is the best Windgauge ever made for a Match Rifle. It has a reversible globe and aperture which can be changed quickly. It is compact in form, being close to the barrel. When set for a given point of wind it is locked by a spring clamp firmly in position.

Ivory Shot Gun.

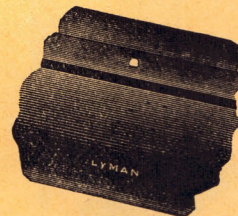

- No. 9.—Sets of front and rear shot gun sights, with reamer for
putting them on, - - - per set, \$1.00

These sights are becoming more popular every day, both at the trap and in the field.

No. 10

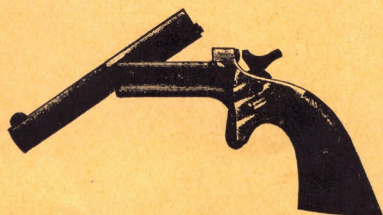

No. 11

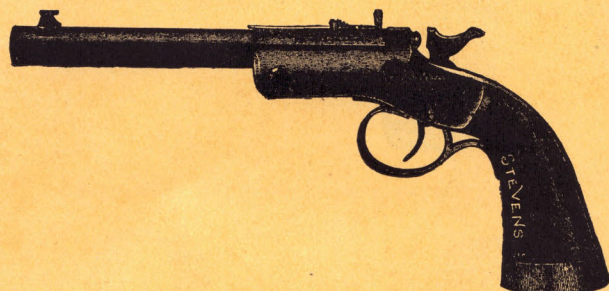

- No. 10.—Ivory, shot gun, front sight, - - - each \$0.50
- No. 11.—Ivory, shot gun, rear sight, - - - " .50

With these sights on a gun the sportsman can tell at once whether the gun fits him or not. The large sale of these sights is not among the amateurs, as might be supposed, but among those who shoot a good deal and appreciate a help toward better work. They also show how very general is the fault of using a gun with too much drop in the stock.

Stevens' Target Pistols. 22 Calibre.

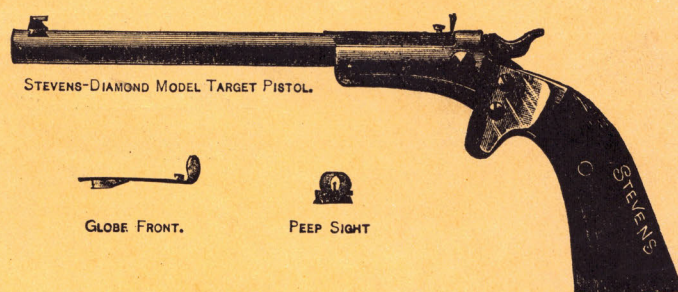

No. 41.—Length of barrel $3\frac{1}{2}$ inches, walnut stock, nickel plated frame, open sight, weight 7 oz., - - each \$4.00

Colt's Automatic Pistols.

Baby Pocket Model, Full Blued Finish, Case Hardened Trigger, Slide Lock and Grip Safety, Rubber Stock, Six Shots.

- 25 Calibre, Length of barrel 2 inches, length over all 4½ inches, weight, each 13 ounces, - - - each \$16.00

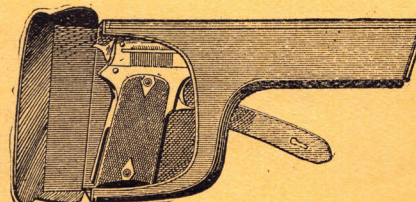

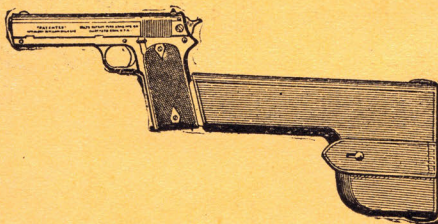

This latest model Colt has been produced to meet the increasing demand for an arm that would combine extra light weight, and very small size, with the practical features of an efficient pistol. Being flat and compact, it can be carried in the vest pocket with perfect safety.

Full Blued Finish, Slide Lock and Automatic Safety, Rubber Stock.

- | | | | |
|---|---|---|---------|
| 32 Calibre, Pocket model, eight shots, length of barrel 3¾ inches, length over all 6¾ inches, weight each 23 ounces, each, | - | - | \$19.50 |
| 38 Calibre, Pocket model, seven shots, length of barrel 3¾ inches, length over all 6¾ inches, weight each 23 ounces, each, | - | - | 27.00 |
| 38 Calibre, Military model, eight shots, length of barrel 6 inches, length over all 9 inches, weight each 38½ ounces, each, | - | - | 27.00 |

Accidental discharge is absolutely impossible with any of the Colt automatic pistols. The 32 calibre is hammerless.

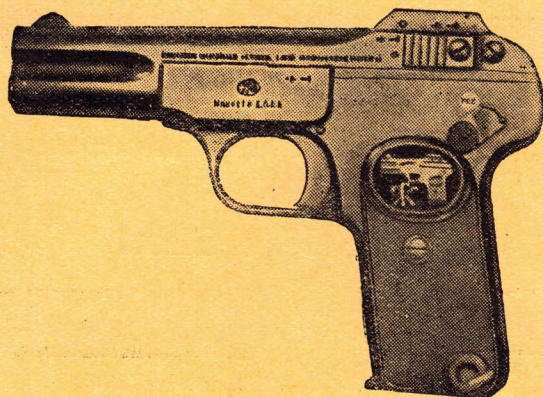

- 45 Calibre, Military model, without holster, full blued finish, checked walnut stock, solid stop safety, seven shots, length of barrel 5 inches, length over all 8 inches, weight, each 33½ ounces, - - - each \$29.00

- 45 Calibre, With combination stock and holster, made of extra quality black leather, well seasoned, lined with buckskin, hand stitched over a light and strong rigid steel frame, military model pistol, same as above, length of holster 11 inches, length over all with pistol attached, 19 inches weight complete each 53½ ounces, - - - each 37.50

This is considered to be the most powerful small arm ever produced and with the combination stock and holster, which may be quickly converted into a shoulder piece, this arm is powerful enough to bring down large game.

Automatic Pistols.

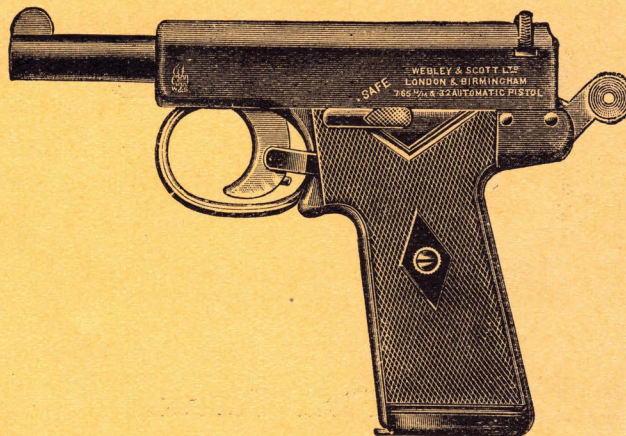

Browning.

- 25 Calibre,** Baby, five shots, blued finish, length over all $4\frac{1}{2}$ inches, length of barrel 2 inches, weight with magazine full 17 ounces - - - each \$13.00
- 32 Calibre,** Seven shots, blued finish, length of pistol $6\frac{1}{2}$ in., length of barrel $4\frac{1}{2}$ in., weight with magazine empty 21 oz., weight with magazine full 24 oz. - - - each 15.00

Simple, sure, accurate and practical, specially remarkable for its compactness and rapidity of fire. The safety catch is easily worked, but so made that it cannot be moved accidentally. It has a very symmetrical and graceful form.

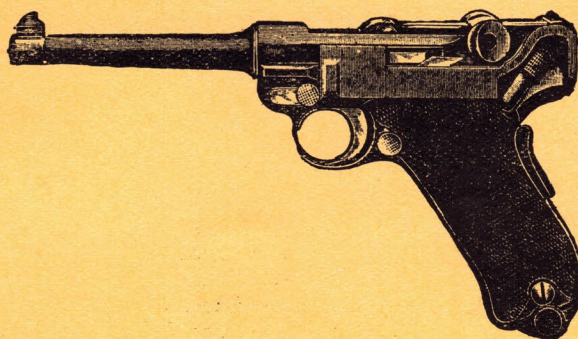

Webley and Scott.

- 25 Calibre,** Baby, six shots, blued finish, length over all $4\frac{1}{2}$ in., weight with magazine full 17 ounces - - - each \$13.00
- 32 Calibre,** Eight shots, blued finish, length over all $6\frac{1}{4}$ in., depth $4\frac{1}{2}$ in., weight empty 20 oz., weight with magazine full 23 oz. - - - each 15.00

This pistol consists of four principal parts: body, barrel, breechslide and magazine. To dismount the pistol for the purpose of cleaning, it is only necessary to pull forward the guard, which can be done without the aid of tools. An efficient safety is provided to admit the pistol being carried at full cock without danger. This pistol is very simple of construction, has very strong mechanism, is small, compact and light.

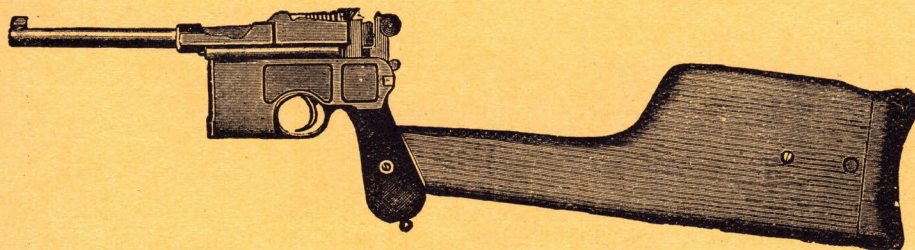

Luger.

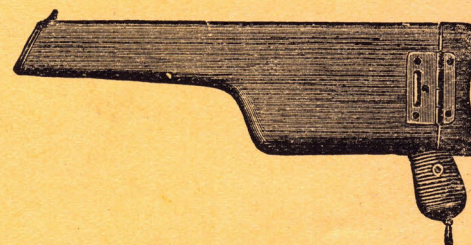

- 30 Calibre—**Eight shots, blued finish, length of barrel $4\frac{5}{8}$ in., weight each 1 lb. 15 oz., - - - each \$35.00

The pistol operates on the link system. It uses a 30 calibre cartridge and the initial velocity of 1,200 feet a second gives the bullet a greater striking effect than a 44 calibre from pistols now in use. Recent tests covered accuracy of aim, penetration, velocity of projectile, and a speed of 116 shots per minute was attained, while the accuracy of aim with rapidity was shown by a score of 24 bull's-eyes out of 30 shots.

Mauser.

With Holster used as stock.

Pistol in Holster.

- 30 Calibre—**Ten shots, blued finish, length of barrel $5\frac{1}{2}$ in., weight without holster $2\frac{1}{2}$ lbs., weight with holster $3\frac{1}{2}$ lbs., complete with cleaning rod and dummy cartridges, - - - each \$35.00

This Self Loading Arm is the latest and most perfect of the various modern Smokeless Powder small calibre arms, heretofore brought out. The barrel of this arm rests and slides on a truck, and the recoil of the fired cartridge, being utilized to automatically perform the functions of discharging the empty shell and reloading the weapon can hardly be felt. This arm, although in the shape of either carbine or pistol, is as accurate as a rifle with a much greater range than most rifles in use. It has a very low trajectory and is sighted up to 500 and 1,000 yards.

Mc & Mc's "Stelor"

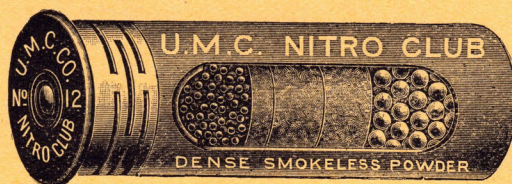

The above shells are specially put up for us by Cogswell & Harrison, of London, England, the celebrated cartridge manufacturers. They are steel lined, very fast primers, machine loaded with "Vicmitte" smokeless powder, and doubled chilled shot. This powder, while new in Canada, is one of the most popular powders among English sportsmen. We absolutely guarantee these shells to be perfect in every particular.

Cartridge Reloading Tools.

Winchester.

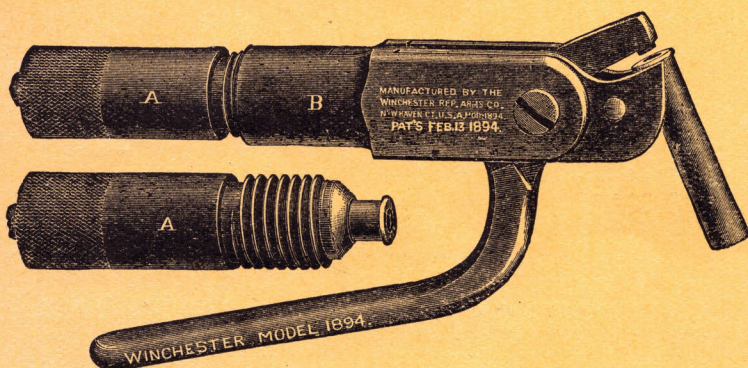

The Lever Tool.

32.—W.C.F.,	-	-	-	-	-	-	-	-	per set \$3.00
38.—W.C.F.,	-	-	-	-	-	-	-	-	" 3.00
44.—W.C.F.,	-	-	-	-	-	-	-	-	" 3.00

The Lever reloading tool, as constructed, removes the exploded primer, straightens the shell at the mouth, inserts the new primer, and fastens the ball in the shell. A set of tools comprises the reloader, a bullet mould, and charge cup.

One set in a box, average weight 2½ lbs. per set.

Winchester.

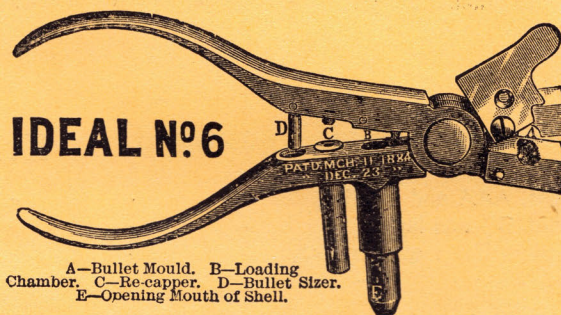

Model 1894 Tool.

33.—Winchester,	-	-	-	per set \$3.50
30.—U. S. Army,	-	-	-	" 3.50
303.—Savage,	-	-	-	" 3.50
32-40.—Winchester,	-	-	-	" 3.50

40-65.— "	-	-	-	" 3.50
40-82.— "	-	-	-	" 3.50

With this tool it will be found possible to easily reload the largest cartridges, compressing the powder, putting the bullet to place, and reducing the shell on the outside to its original form. This tool, new in principle, permits, with the use of little force, the most exact reloading, including the resizing of the shell.

One set in a box, average weight 3¼ lbs. per set

Ideal.

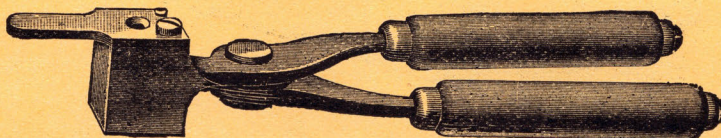

A—Bullet Mould. B—Loading Chamber. C—Re-capper. D—Bullet Sizer. E—Opening Mouth of Shell.

No. 3.—With single adjustable chamber, made for all regular sporting and military cartridges grooved or patched bullet, and for Savage rifle cartridges,	-	-	-	per set \$3.50
No. 3.—With double adjustable chamber, otherwise same as above,	-	-	-	per set 4.00
No. 6.—Regular for sporting and military cartridges, with grooved bullets,	-	-	-	per set 3.50
No. 6.—With adjustable chamber, for all cartridges measuring two and one-half inches in length, otherwise same as above,	-	-	-	per set 4.00

One in a box, average weight 1¾ lbs.

Bullet Moulds.

Grooved Bullets, all regular sizes,	-	-	-	-	-	-	-	-	per set \$1.50
-------------------------------------	---	---	---	---	---	---	---	---	----------------

One dozen in a box.

Steel Game Traps.

“Victor,” “Hawley & Norton” and “Newhouse.”

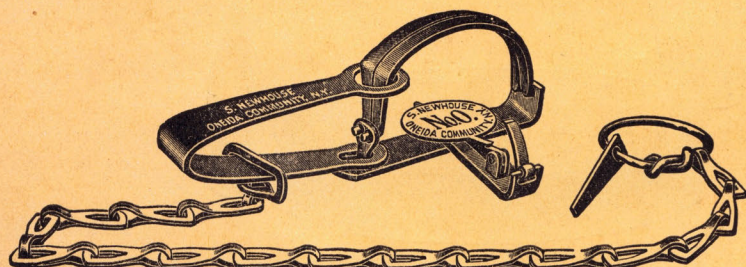

NOTE.—We stock and illustrate the only complete line of the above world famous steel traps in British Columbia.

The Genuine Newhouse. This is the highest grade steel game trap made. To the professional trapper they need no introduction. The springs are of the best crucible steel, and the stock from which the jaws and other parts of the traps are made are from a special mixture of Norway iron. The springs are subjected to three separate tests and all other parts are thoroughly tried and inspected before leaving the factory. We absolutely guarantee these traps, against any defect whatever.

The Hawley & Norton. While almost identical in form with the Newhouse, is made lighter throughout and is therefore considerably cheaper. It is a good reliable trap with a fair reputation.

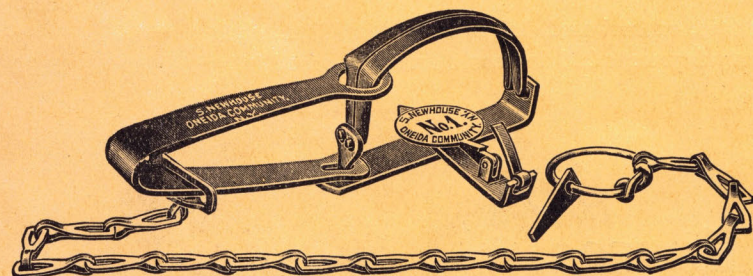

The Victor. Although less expensive than the Newhouse or the Hawley & Norton, they are the best traps to be had at the price. The professional trapper will always use the Newhouse or the Hawley & Norton, but farmers and amateur trappers who find that cheaper traps will answer their needs, are satisfied with the Victor. These traps are made in the same patterns throughout as the more expensive ones and they will be found reasonably satisfactory.

In ordering traps be careful to state which one of the above three grades is required.

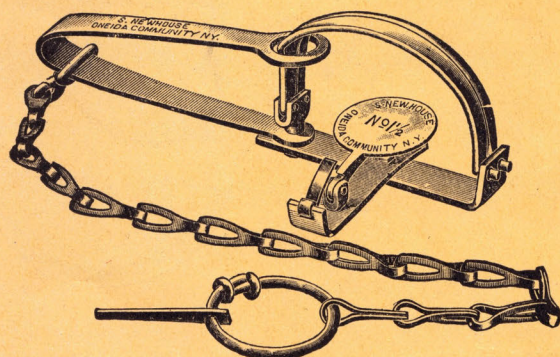

No. 0.—For Rats and Gophers, $3\frac{1}{2}$ in. Spread of Jaws, with Chains.

Victor, weight per doz. $5\frac{1}{2}$ lbs.,	-	per doz.	\$2.15
Hawley & Norton, weight per doz. 6 lbs.,	-	"	3.00
Newhouse, weight per doz. $6\frac{1}{2}$ lbs.,	-	"	4.25

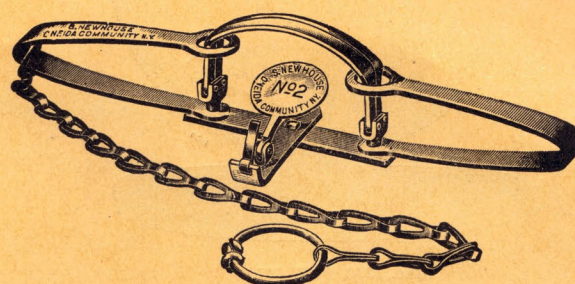

No. 1.—For Musk Rats, Skunks, Etc., 4 in. Spread of Jaws, with Chains.

Victor, weight per doz. $7\frac{3}{4}$ lbs.,	-	per doz.	\$2.50
Hawley & Norton, weight per doz. $8\frac{1}{2}$ lbs.,	-	"	3.50
Newhouse, weight per doz. $9\frac{1}{4}$ lbs.,	-	"	5.00

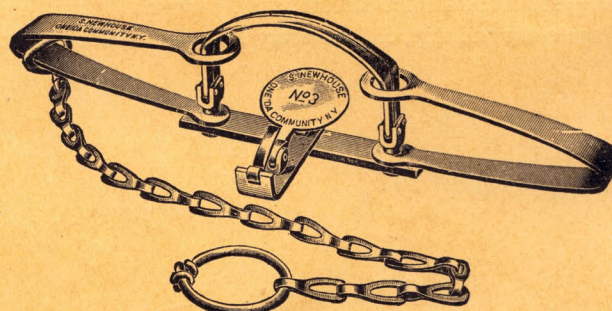

No. $1\frac{1}{2}$.—For Minks and Foxes, $4\frac{3}{4}$ in. Spread of Jaws, with Chains.

Victor, weight per doz. $11\frac{1}{4}$ lbs.,	-	per doz.	\$3.75
Hawley & Norton, weight per doz. 12 lbs.,	-	"	5.25
Newhouse, weight per doz. 13 lbs.,	-	"	7.50

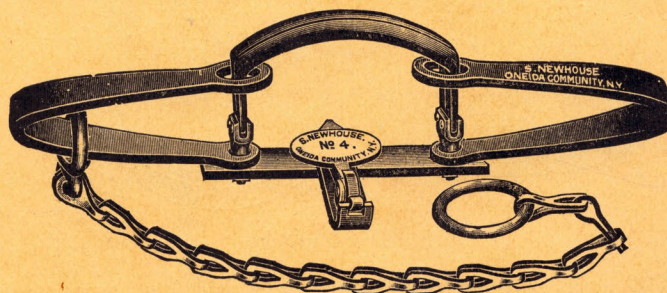

No. 2.—For Foxes, $4\frac{3}{4}$ in. Spread of Jaws, Double Spring with Chains.

Victor, weight per doz. $14\frac{1}{2}$ lbs.,	-	per doz.	\$5.25
Hawley & Norton, weight per doz. $15\frac{3}{4}$ lbs.,	-	"	7.35
Newhouse, weight per doz. 17 lbs.,	-	"	10.50

No. 3.—For Otter, $5\frac{1}{2}$ in. Spread of Jaws, Double Spring with Chains.

Victor, weight per doz. $22\frac{1}{4}$ lbs.,	-	per doz.	\$7.00
Hawley & Norton, weight per doz. 25 lbs.,	-	"	9.80
Newhouse, weight per doz. 28 lbs.,	-	"	14.00

No. 4.—For Beaver, $6\frac{1}{2}$ in. Spread of Jaws, Double Spring with Chains.

Victor, weight per doz. 25 lbs.,	-	per doz.	\$8.25
Hawley & Norton, weight per doz. $28\frac{1}{2}$ lbs.,	-	"	11.55
Newhouse, weight per doz. 33 lbs.,	-	"	16.50

All of the above open stock.

Steel Game Traps.

Tree.

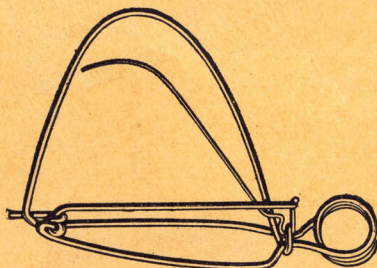

Best Quality Steel, with Heavy Highly Tempered Steel Spring.

- No. 1.—For squirrels and minks, weight 15 lbs., - per doz. \$3.50
 No. 2.—For minks and martens, weight per dozen 17 lbs.,
 per dozen, - - - - - 4.00
 No. 3.—For raccoons, foxes, etc., weight per dozen 19 lbs.,
 per dozen, - - - - - 4.50

All experienced trappers will fully appreciate the fact that this trap will kill anything that it catches. It can never be snowed under and is always easy to locate.

The illustration shows the trap holding a raccoon, and also illustrates the manner of placing the trap on a tree trunk.

Stop Thief.

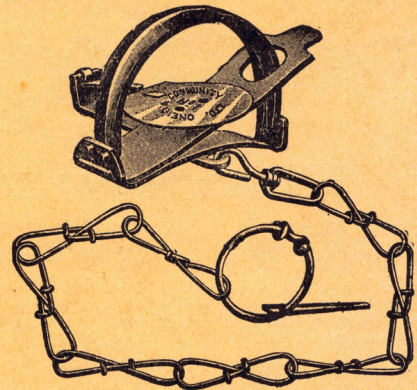

Spring Steel Wire, Black Finish.

- No. 1.—For rats and squirrels, wt. per dozen 4 lbs., per doz. \$1.75
 No. 2.—For minks, martens and skunks, weight per dozen 6
 lbs., - - - - - per doz. 2.50
 No. 3.—For minks, martens and skunks, weight per dozen 8
 lbs., - - - - - per doz. 3.00
 No. 3½.—For raccoons, weight per dozen 15 lbs., " 4.80
 No. 4.—For foxes, wolves, etc., wt. per doz. 28 lbs., " 9.60

Half dozen wired together in a bundle.

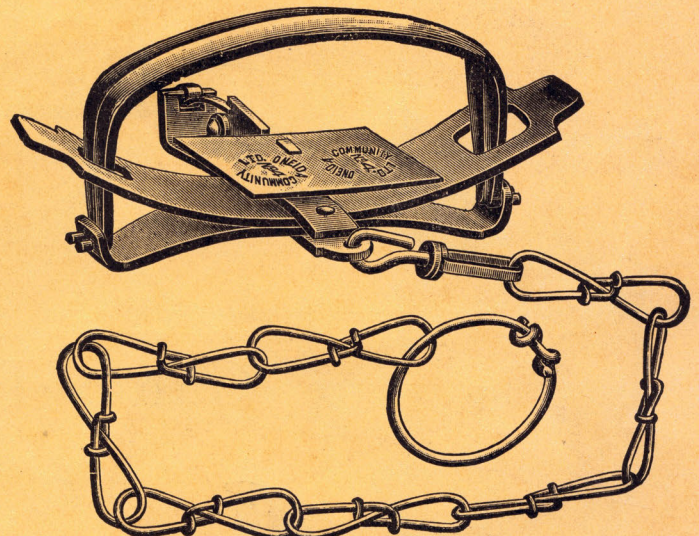

This trap is said to be the best ever offered for catching small fur-bearing animals. Place it in front of holes and the animal will be caught by the neck or body and will be killed without breaking the skin or drawing blood. The traps have no spikes, barbs or cutting parts. With this trap the animal has no chance to gnaw free as when caught by the leg.

Jump.

With Chain.

- No. 0.—For rats or gophers, 3½ in. spread, weight per dozen
 3½ lbs., - - - - - per doz. \$2.90
 No. 1.—For musk rats, 4½ in. spread, weight per dozen 5½
 lbs., - - - - - per doz., 3.25
 No. 1½.—For minks, 5½ in. spread, wt. per doz. 6 lbs., " 3.75

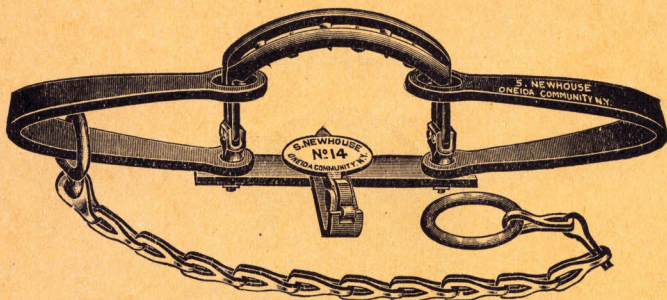

With Chain

- No. 2.—For minks, 5½ in. spread, weight per doz. 6 lbs., per doz. \$6.00
 No. 3.—For foxes or otter, 6½ in. spread, weight per dozen
 14 lbs., - - - - - per doz. \$7.00
 No. 4.—For otter and wild cats, 7 in. spread, weight per
 doz. 16 lbs., - - - - - per doz. 8.00

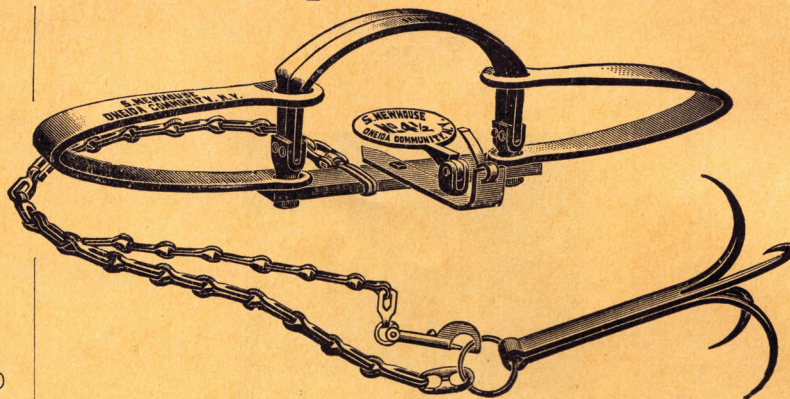

The Jump trap is lighter and easier to carry than other styles. They lie very flat and are easily secreted in the runways of animals. The jaws have full wide meeting faces, which are much less liable to break the animal's leg.

Steel Game Traps.

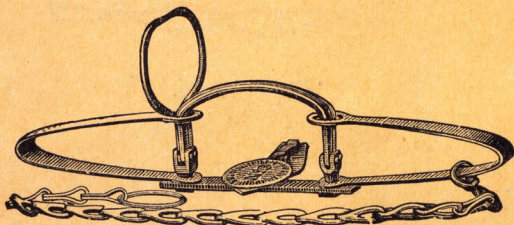

No. 14.—Newhouse, for beaver, $6\frac{1}{2}$ in. spread of jaws, heavy steel double springs, offset jaws with teeth, weight per doz. 40 lbs., - - - per doz. \$17.50

The offset jaws allow the springs to rise higher when the animal's legs are in the trap, and are furnished with teeth sufficiently close enough to prevent the animal from pulling them out.

No. $4\frac{1}{2}$.—Newhouse, for wolves, 8 in. spread of jaws, heavy steel double springs, with chain and pronged drag, extra heavy swivel chain 5 feet long, and heavy snap. Warranted to hold 2000 lbs., weight per doz. 96 lbs., per doz. \$40.00

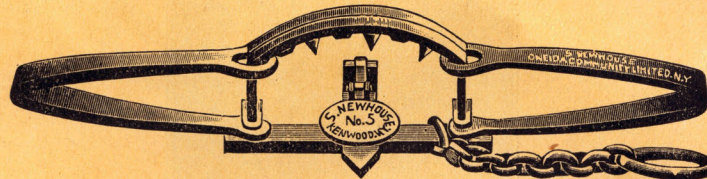

Newhouse, for Beaver, with Detachable Clutch, Double Spring and Chain.

No. 23.— $5\frac{1}{2}$ in. spread of jaws, weight per doz. 35 lbs., per doz. \$16.60

No. 24.— $6\frac{1}{2}$ in. spread of jaws, weight per doz. 40 lbs., " 19.00

This trap is wonderfully successful for taking beaver. Set in the water with clutch end farthest from the shore. To attach the clutch screw down the two ends with the clamp, place the opening of the slot directly over the rivet, slip one of the clutches into its place, turn and hold upright and attach the other clutch in the same manner.

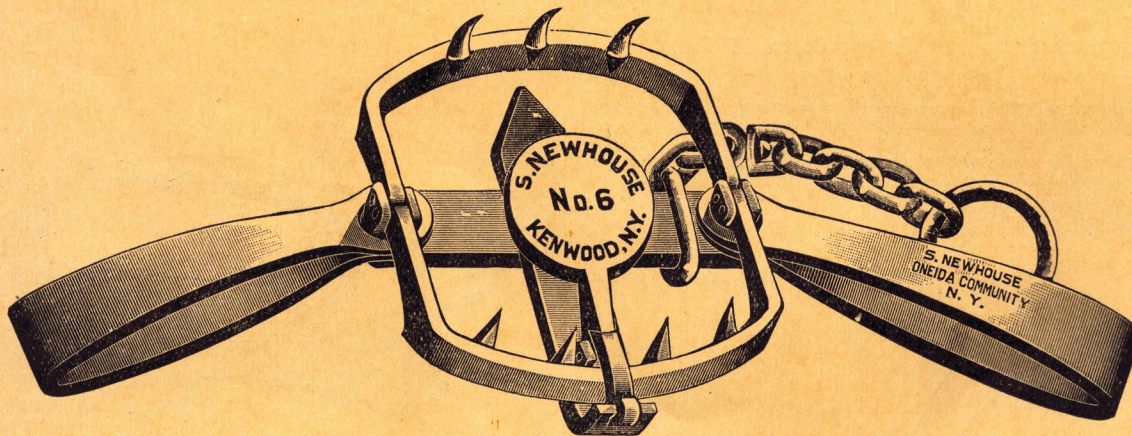

Newhouse, for Bears, Double Spring with Extra Heavy Chain.

No. 50.—Spread of Jaws 9 in., weight each $11\frac{1}{4}$ lbs., each \$5.50

No. 5.—Spread of jaws $11\frac{3}{4}$ in., weight each 19 lbs., " 10.00

These traps give absolute satisfaction in their respective fields. The No. 50 is for small bear and the No. 5 for the common black bear. No animal has ever been known to get out of one of these traps, when once caught.

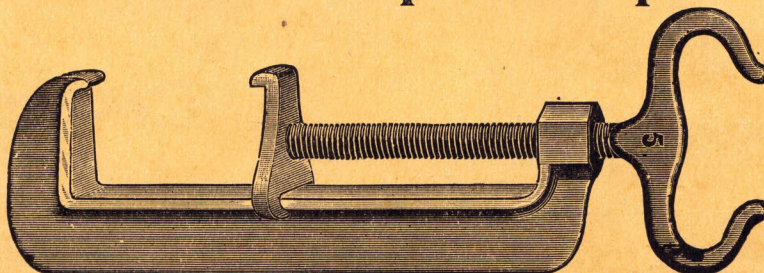

No. 6.—Newhouse, for grizzly bears, spread of jaws 16 in., with extra heavy chain, weight each 42 lbs., - - -

each \$23.50

This is the strongest trap in the world, and is used in other countries to catch lions and tigers.

Game Trap Clamps.

Malleable Iron, Used Two on a Trap.

No. 4.—Opens $2\frac{1}{2}$ in., for traps Nos. 2, $2\frac{1}{2}$, 3, 4 and 14, weight per doz. $2\frac{1}{2}$ lbs., - - -

per doz. \$2.50

No. 5.—Opens $4\frac{1}{2}$ in., for traps Nos. 50, $4\frac{1}{2}$ and 5, weight per doz. 9 lbs., - - -

" 6.00

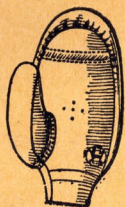

No. 6.—Opens 6 in., for No. 6 grizzly bear traps, weight per doz. 21 lbs., - - -

" 10.00

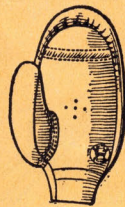

By applying one of these clamps to each spring and turning the thumb screw, the springs are quickly pressed into place so that pa n may be adjusted and safely set. The handle is so shaped that a bar may be used when springs are too stiff.

- No. 1.—Pressed steel, finely enamelled, very strong, light and compact, highly finished and noiseless, can be readily attached to any wall, platform complete with bag, pure rubber bladder, lace and suspending cord, - each \$12.00

Striking Bag Swivels.

- No. 335.—Japanned, bag can be removed by simply untying knot, and is so constructed that the cord cannot wear, per dozen, - - - \$6.00
- No. 309.—Nickel plated, ball bearing, bag can be removed by simply putting the knot through the opening and untying, per dozen, - - - 9.00
- No. 337.—Nickel plated, ball bearing, bag can be removed by unscrewing socket, - - - per doz., 15.00

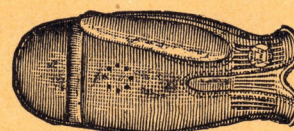

Striking Bag Bladders.

Tested and Guaranteed.

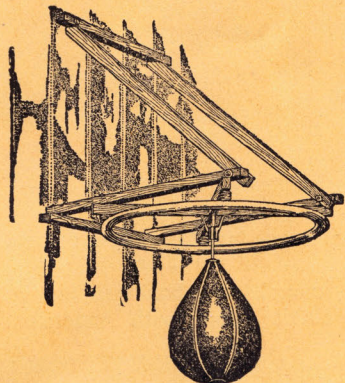

- No. B.—Is used in Nos. 0, 1, 3½, - each \$1.00
- No. 5.—Is used in Nos. 4½, 10, 12, 15, 18, 35, " 1.25
- No. 7.—Is used in No. 25, - - - " 1.50

Striking Bag Gloves.

- No. 7.—Fine brown leather, well padded, - per pair \$0.75
- No. 4.—Finest brown tan leather, padded with best felt, " 1.50

Spring Striking Bag Platforms.

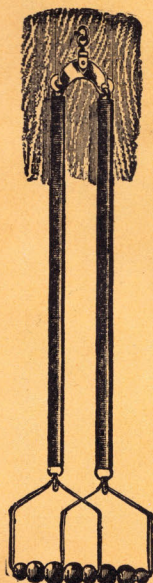

- No. 30.—The "Racine," selected hard wood frame, neatly finished and securely bolted together, oil finished maple rim with four crucible steel compression springs between the rim and the frame, new design noiseless swivel, weight each 7 lbs., - - - - - each \$5.00

The "Racine" Striking Bag Platform is constructed of selected hard wood, neatly finished and securely bolted together, the rim is of maple, oil finished, and has four crucible steel compression springs between the rim and frame. The springs act as a cushion and absorb all vibration, besides making the action of the bag extremely lively. The swivel is of new design, made of metal, and is noiseless. The bag rope is easily adjusted, and will not wear as readily as in most swivels. The platform is easily adjusted to a wall or ceiling, and is very rigid when in position for use.

Gymnasium Supplies.

"Racine" Spring Exercisers.

RACINE CHEST EXPANDER and BUST DEVELOPER.

Two Heavy Nickel Plated Oil Tempered Steel Spiral Springs, Suspended From a Steel Swivel Top, Steel Handles With Ebony Finished Massage Roller Grips, With Chart Illustrating 42 Different Movements.

- No. 1.—Light for women and children, each \$3.00
No. 2.—Medium for women and men, " 4.00
No. 3.—Strong, for athletes, - " 5.00

The "Racine" Spring Exerciser is composed of two heavily nickel plated, oil tempered, steel spiral springs, suspended from a steel swivel top. The handles are of steel with ebony finished, massage roller grips. Each spring on the exerciser may be extended seven feet, and being tested beyond this limit, is guaranteed to retain its original strength and elasticity.

The "Racine" Exerciser has many advantages over other exercisers. It will not deteriorate by use, age or laying idle, there being no rubber to rot, cables to break, or oily pulleys to soil wall or floor and to get out of order.

It is absolutely noiseless, and if used as directed in chart of instructions will last indefinitely. The patent swivel is a feature not found in any other exerciser. A greater variety of

movements are possible and one may change from any position without releasing hold on handles.

The "Racine" Exerciser can be instantly changed from a down pull to an up pull and vice versa, and the springs may be quickly detached from the swivel top and attached to screw hooks at any other point, thereby getting pulls from many desired angles.

The handles can be detached from springs in an instant and attached to the ends of a single spring, making an ideal chest expander.

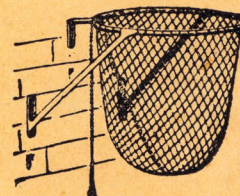

Basket Ball Supplies.

Balls.

- No. 3.—"Practice," Fine pebble grained sheep skin leather with capped ends complete with bladder and lace, each \$2.50
No. 0.—"Official," Special imported leather expressly tanned, made in eight sections, complete with special bladder, pump for inflating, lacing needle and leather lace, each 5.00

Goals.

- No. 12.—With 12 in. extension brackets, heavy iron top ring, 18 in. in diameter, extra heavy cord net, securely braced on both sides, - - - - - per pair \$6.00
No. 6.—With 6 inch extension brackets, otherwise same as No. 12, - - - - - per pair 6.00

Ideal Massage Grips.

- No. 10.—Combined grip machine and massage roller, nickel plated heavy music wire frame, ebony finished handles, complete with full instructions for massage and exercise, each - - - - - \$1.50

A combined Grip Machine and Massage Roller, for strengthening the hands, wrists and forearms, and massaging the muscles, abdomen and stomach.

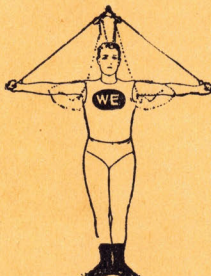

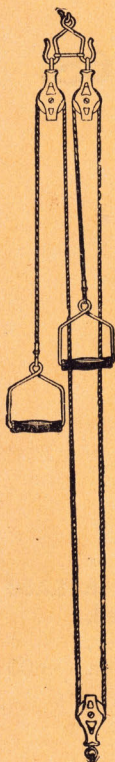

Grips are constructed of music wire, heavily nickeled, and have ebony finished handles. They are handsome, durable and efficient grip machines and we guarantee them.

Specially beneficial to telegraph operators, pianists, book-keepers and those who use the muscles of their hands and wrists in their daily toil.

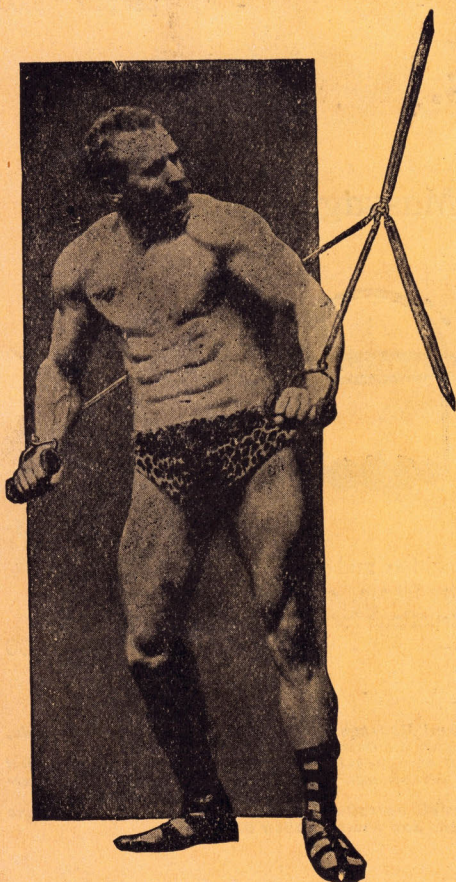

Gymnasium Supplies.

Whiteley Exercisers.

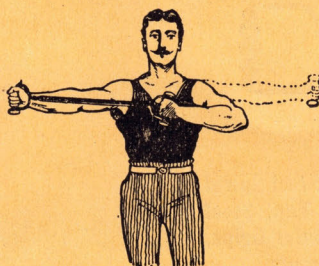

- No. 0.—With foot attachment, door hinge attachment and package of hooks, heavy, medium, light or child's cables, complete with chart, - - - - - each \$3.00
- No. 1.—Fitted with noiseless cone-bearing adjustable pulleys, finely enamelled, complete in box with foot attachment, door hinge attachment and package of hooks, heavy, medium, light or child's cable, with Anderson's Physical Culture, - - - - - each 4.00
- No. 2.—Fitted with extra finish, noiseless cone-bearing adjustable pulleys, all parts nickel finish, complete in box with foot attachment, door hinge attachment and package of hooks, extra heavy, heavy, medium, light or child's cable, with Anderson's Physical Culture, - - - - - each 5.00
- No. 3.—Fitted with silk covered cable, polished rubber or cork handles, otherwise same as No. 2, - - - - - 6.00
- One in a box, weight each 2½ lbs.

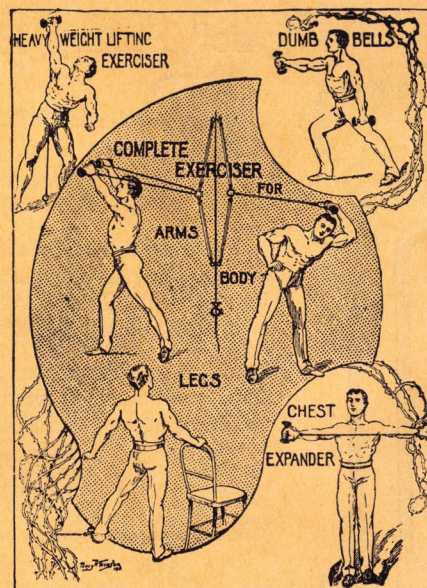

The Whiteley is a practical home gymnasium, with it every muscle in the body can be properly exercised. It is small and compact and can be fastened to door frame, hinge or any convenient place; it is always ready for use without any adjustment, and can be put up or taken down at the convenience of the user.

Sandow Developers.

The Sandow developer consists of a combination of silk covered rubber cords with dumb bell attachments, and combines in itself a complete home gymnasium that can be used by all members of the family from the weakest to the strongest. It is the best and most convenient apparatus for carrying out the world famous Sandow system of bodily development and health building. It can be used as a wall exerciser, a heavy weight lifting exerciser, a chest expander or a pair of light dumb bells, may be used separately. It is a marvelously strong and durable piece of apparatus.

The Standard.—With chart of muscular system, chart showing use of developer, chart of chest expander exercises and chart of general instructions, complete with wall hooks, each \$6.00

One in a box, weight 5 lbs.
